ESSENTIAL INDUSTRY

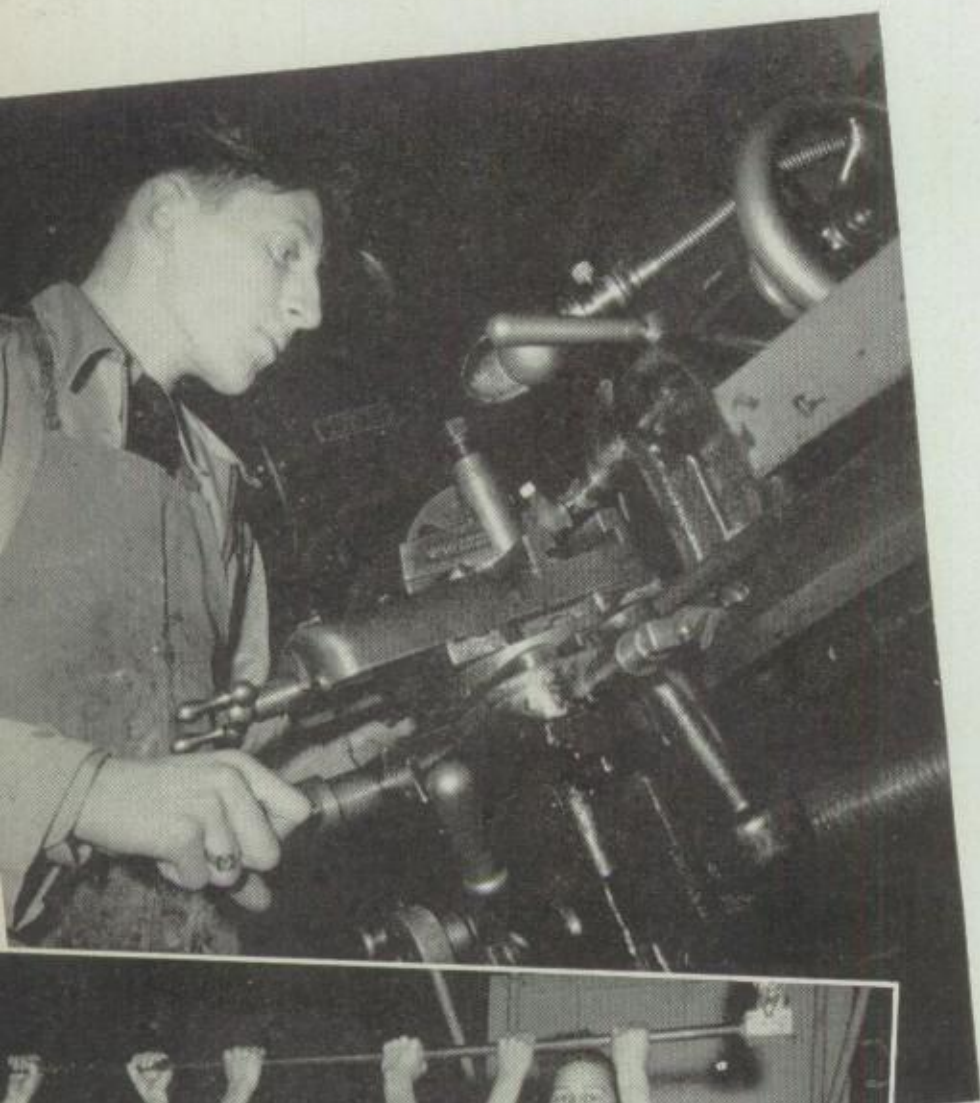

CRANE ESSENTIAL INDUSTRY

★ Why should Crane be classed as “an essential industry”? Crane is a part of one of the most essential industries during a war or during peace; the production of citizens able and willing to maintain the standards and live up to the ideals of a democratic society. The work being done here is a very important factor in the future development of this country. ¶ During the war, students at Crane are prepared physically as well as mentally for their role in this relentless conflict. When peace finally comes, students of Crane will enter the world better prepared to keep that peace and understand the problems that will face democracy.

Principal's Message . . .

W H I T H E R C R A N E ?

★ In my Science and Craft Annual of 1914, "To Know and To Do" stands as a guiding light to that fine body of 1500 students and sixty faculty members of whom only four of us are here now. ¶ A school is known by the scholarship and conduct of its students and by the competence of its graduates. For over fifty years "To Know and To Do" has inspired our boys to achieve while attending school and to succeed in after life. The classes of '44 and '44½, we are sure, are no exception. You are to be congratulated on your development under the able sponsorship of Mr. Bickner, Mr. Reinstein, Mr. Sullivan, and Mr. Werre, and the leadership of your fine coaches and teachers throughout your four years. We anticipate that this will be reflected in the service you render to our community and nation. We bid you adieu with mixed feelings of joy and regret. ¶ It was no small task to which you set yourselves four years ago. You well deserve the excellent technical training with which you prepared yourselves for college or for employment. Your success, however, is due not to your own efforts alone. You owe a great deal to your devoted parents, to your sympathetic and helpful teachers, and to a generous public, all of whom have made your education possible. Do not forget that you have incurred these obligations. Whether you enter college or the world of work, you should further develop your community interests and civic consciousness, lest you live for yourself alone. We are certain you will shoulder your responsibilities well. ¶ Temporarily, your plans may be interrupted by a period of military service to your country. We know you will do honor to your school. You will return with greater courage, initiative, resourcefulness, and determination to make good. ¶ A word to the rest, 4B down to 1B. Let us develop habits of study and industry, habits of right thinking and courageous action. These are many fine qualities necessary to good citizenship in a democracy. We must be able and ready to answer our country's call to service in the future, whether it be civil or military. Let us hold high, for the growing young men of Chicago's great West Side—Crane's fine motto: "To Know and To Do."

MATHEMATICS DEPARTMENT

★ The mathematics department has one of the most important jobs in the school. Their duty is to train students in such a way that they will be of great value to the war effort and will be better trained for a post-war job. Our future bombardiers, navigators and pilots, must have a good foundation in mathematics to be able to cope with the advanced math courses they will meet in the Air Corps training.

At Crane, a new division of the mathematics department was recently formed — a pre-flight course, with Miss Regina Devine as instructor. The purpose of this course is to prepare students for advanced work in aeronautics.

The regular mathematics course for non-language students requires Algebra 1, 2 and 3 and Geometry 1, 2 and 3. Trigonometry and a college survey course are offered to the ambitious Craneite as advanced work. The language

students are only required to take one year of algebra and one year of geometry. However, it is to their advantage to take Algebra 3 and Solid Geometry also.

Four semesters of essential mathematics are required of students who are taking the Smith-Hughes Course. There are 3555 Craneites now taking math of one kind or another. The math department is headed by Mrs. Anastasia Springer.

ENGLISH DEPARTMENT

N. Bjorklund

★ At first glance the work of the English department may not seem important to the war effort. However its work is just as, if not more essential than, that of any of the other departments.

The English department must train students to be able to use correct English and promote their ability to give and understand orders. You can readily see how confusion might result from a poorly-worded order. Such confusion cannot be permitted if we are to win this war.

In reality, on the English department rests the responsibility of preparing students for officer training in our armed forces. This preliminary training is an important factor in the student's education for it may determine whether he will enter officer training school or be placed in the ranks.

The English department at Crane, with Miss Ruth Corrigan as chairman, is accomplishing its purpose admirably by preparing students for their part in this war. Three years of English are required of every student and English 7 is recommended for advanced work. There are 3800 students now taking English.

BIOLOGICAL SCIENCES

★ Today more than ever the importance of scientific training cannot be stressed too much. Every weapon that goes to the front has been made possible only through the efforts of the nation's scientists. We have benefited greatly from their work in the past and the future will undoubtedly bring many more labor and life saving discoveries. Whether we use these advances for the good of mankind or turn them into destroying monsters depends on the type of citizen our schools develop.

Here, at Crane, a minimum of two years of science is required, but the wise student takes the four year course which includes general science, biology, physics and chemistry. Our science department is well-equipped with 5 general science, 12 biology, 10 physics and 4 chemistry

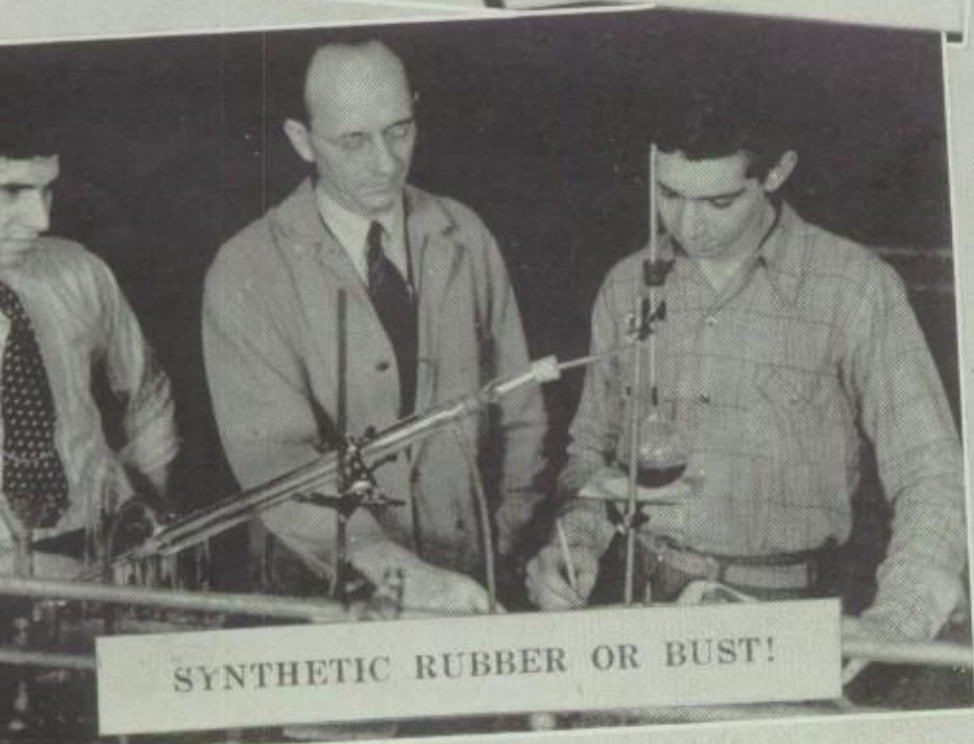

laboratories and staffed with 30 excellent instructors.

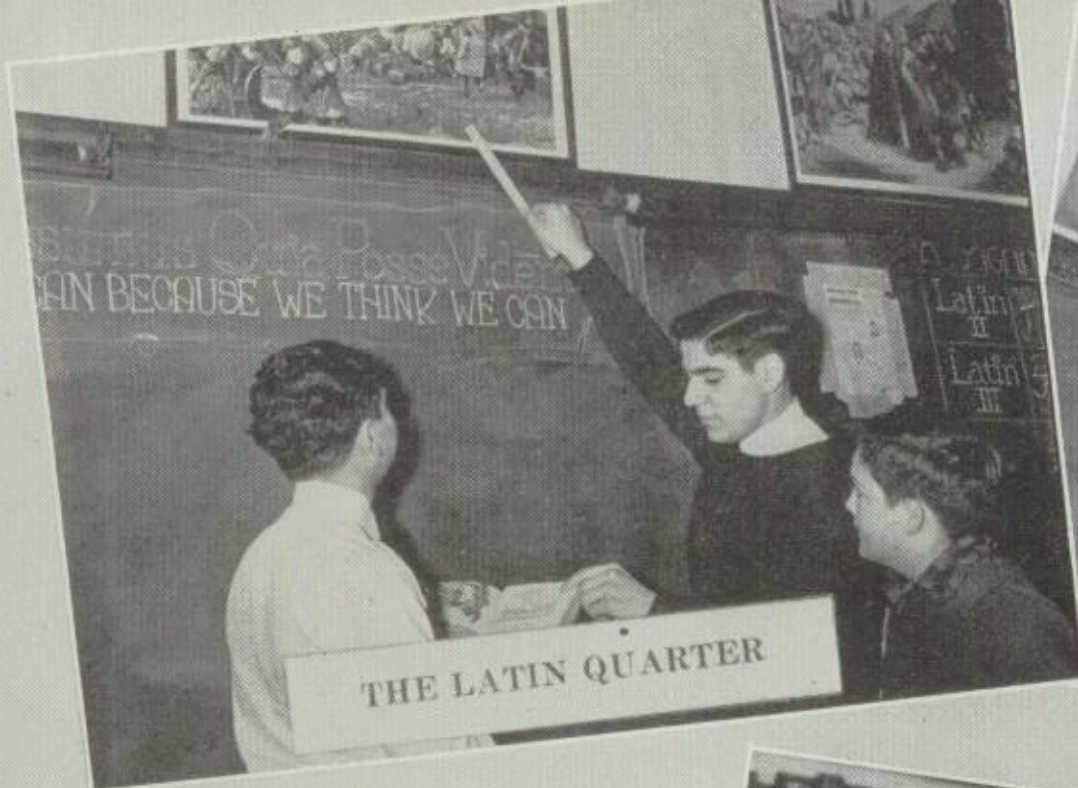

General science prepares the student for the more advanced courses. Biology tells him about the various phases of plant and animal life and explains their importance and relationship to man.

The physics course covers a wide range of natural phenomena. Intensive studies are made of mechanics, heat, sound, light, magnetism, electricity, radio and radioactivity.

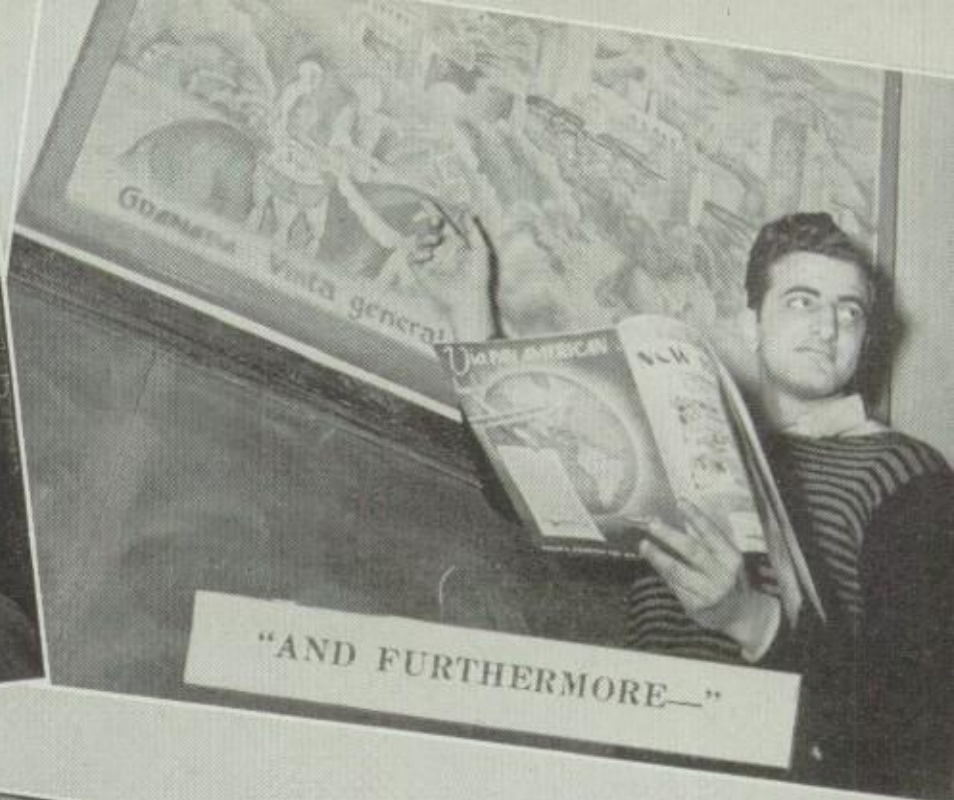

In the chemistry classes the student is introduced to the "Building Blocks of the Universe" and taught how their different compounds form all of the known world.

At the present time 3611 students are taking some kind of science.

Foreign LANGUAGES

★ Today, in a world where nations find themselves growing closer and closer together as a result of scientific achievement, the value of knowing a foreign language is greater than ever.

When the war ends, hundreds of our professional men will go abroad to help rebuild the world. To do this, they must have a knowledge of the language of the country in which they plan to work. A good foundation for this knowledge can be obtained in the two year language course offered here at Crane. Students have their

choice of five foreign languages; namely, German, French, Latin, Italian or Spanish.

Crane's language department is headed by Mr. Craig. At the present time, there are about seven hundred students taking a foreign language.

Social STUDIES

★ Some of the most important subjects taught at Crane are included in the social studies group. Civics and U. S. History are considered so essential, every Craneite must have had a course in each in order to graduate.

In the Civics classes, Craneites are taught the structure and functions of our form of government. U. S. History students learn the series of historical events which lead up to the present situation in our country.

Crane's nine social science instructors have worked hard in preparing each student for graduation and for his job "over there."

Modern European History and Careers are two optional courses which may be taken as electives by the more ambitious Craneites. The Modern History Course deals with the development of Europe from early times to the present day. Students in the Careers classes are given a series of tests which help them to choose the vocation for which they are best fitted.

Crane's TECHNICAL AND

TECHNICAL SHOPS

★ Trained workers are at a premium and Crane is doing its part to help end the war sooner by supplying more and more technically trained students to war industries. Crane's technical shops are producing hundreds of semi-skilled workers who will soon take their place in industry.

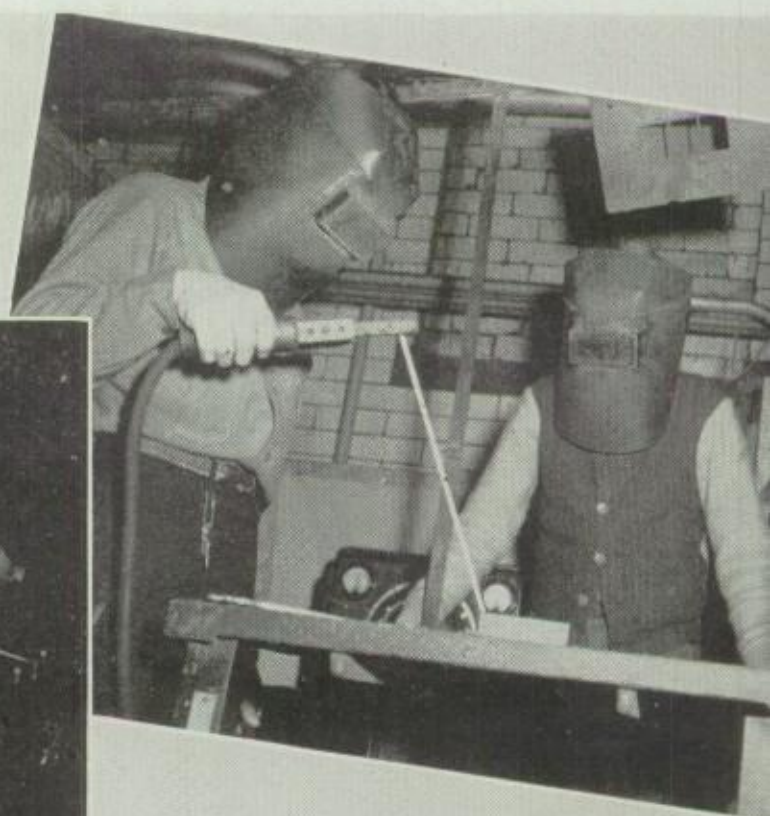

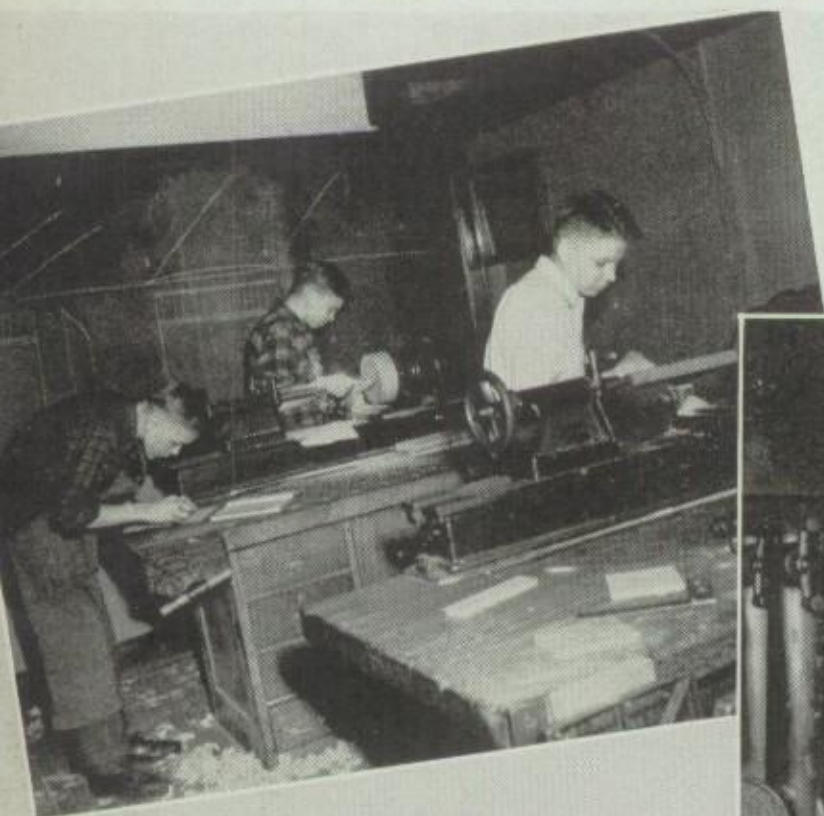

All Craneites must take two semesters of woodshop, one semester of machine shop and one semester of electric shop. Two semester of any other shop such as auto, forge-welding, foundry, print, aero or radio are also required. The training received here at Crane will be of value during the rest of a student's life, whether he attends college or not. You may be sure that Crane Tech will be well represented in the world of industry in the days to come.

VOCATIONAL SHOPS

★ The Smith-Hughes Courses have been, in the past, intended primarily for students who didn't intend to go to college. However, since the outbreak of the war they have served to enlarge the reservoir of skilled labor necessary to the production and maintenance of the greatest fighting machine in the history of the world.

Students in Smith-Hughes shops spend two hours and thirty-five minutes of their school day at their chosen work. For the rest of their curriculum they must have subjects related to their shop only. These include essential mathematics, science, English, related history and drawing.

There are some 1020 Craneites now taking a Smith-Hughes Course. They are under the guidance of teachers who present courses in printing, foundry, electricity, radio, auto, machine, linotype and architecture.

Mechanical DRAWING

★ The Mechanical Drawing department here at Crane is performing an invaluable service to this country during the war and will continue to benefit the nation in the peace to come because draftsmen are essential to the development of every new product. Designs and blueprints from which to work must be made by them. All of our weapons of war were once just pencil marks on a draftsman's board.

Two years of mechanical drawing are required of every Crane student. With this training those students so desiring may enter the field of drafting with a distinct advantage over those persons who have had no previous experience. The training is also valuable to those students who do not intend to become draftsmen because they

learn methods of arrangement and spacing which will aid them in their other classes.

For those with real talent in this line, an architectural drawing course may be taken in which the student spends half of his school day at this specialized course.

The mechanical drawing department under the leadership of Mr. Edwin Salter now has 3,100 students studying Mechanical Drawing 1, 2, 3, or 4.

Music and Art

★ Music is, and will continue to be, one of the main factors in bolstering the morale of the world. Today, in Crane, it is taught to students interested in a musical background. Experience in an orchestra, solo work in voice or with an instrument, or just general appreciation and enjoyment of music can be obtained from our several outstanding teachers in this field. These teachers have done fine work in producing and maintaining excellent musical abilities in the students.

Art, as well as music, is important in helping the individual obtain self expression. Such expression is important in commercial art where a specific thought must be expressed vividly and directly.

Printing and free hand sketches are stressed since, to Crane boys, they constitute the most useful phase of the wide field of art.

Mr. Overholser is the head of this department. His staff consists of 3 teachers all working hand in hand to produce well educated students of art.

There has always been much co-operation between these departments and other school activities. Many posters of gigantic size are made for social occasions of all kinds. War bond drives, elections, and dances are all subjects on which many posters are seen in the school. They are made by the students for the students. The music department is equally as co-operative. They provide musical entertainment for assemblies and other special gatherings.

Physical EDUCATION

★ In answer to the government's plea for physically, as well as mentally trained men, Crane's eleven physical education instructors have devised a strenuous program for every boy.

In order to graduate, every boy must take four years of gymnastics or swimming and health, or R.O.T.C. and health.

Regular "G.I." calisthenics have replaced old fashioned exercises in the gymnastic classes and have proven their value by hardening the muscles of Joey Craneite. In the swimming classes, every boy must be able to swim in the deep water, since a lack of this ability has cost many lives on sinking ships. Boys belonging to the R.O.T.C. get their exercise through drilling and rifle calisthenics, in addition to some theory

of military training. The health classes stress the care and cleanliness of the body besides teaching what makes Joey Craneite tick.

For those Craneites wishing to go further in making themselves physically fit, there is Crane's large variety of teams. Ranging from football to fencing these teams are furnishing the necessary competitive spirit which is so essential in developing boys morally as well as physically.

Crane P. T. A.

★ The Crane Parent Teachers Association has performed and is continuing to perform a great service both to the school and to the community. The P.T.A. sees to it that needy students receive necessary aid and brings about a closer relationship between the school and the home.

In wartime, this service is more important than ever. Many problems come up which are of vital importance to every parent and teacher. Improvements in school and community life are among the goals of the Crane P.T.A.

The P.T.A. holds teas, has lectures by faculty members, enjoys student round table discussions and visits places of interest in the city.

IN THE AIR ON

Do not tread by my cross lightly.

No!

Let the earth tremble and shake with
the weight of your steps.

March on!

Let me know I have not made my
sacrifice in vain,

Let me know I have not bled for a
lost cause. . .

Let us know we are not forgotten
men!

March on! Work on! Fight on!

Let Victory rise in your hearts like
the sun, and black clouds of tyr-
anny scatter over the horizon of
forgotten years. . .

Weep not for us who are not with you.

We are not dead. . . We live!

We are the life of the Peace to come!

“UNITY FOR PEACE”

By LEOPOLD B. SEGEDIN

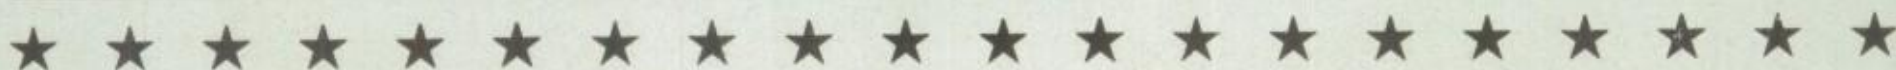

★ To meet the realities of a post-war world, unity among the nations has been set up by our wartime leaders as a guiding principle in the establishment of peace. Although international peace-planners have resorted to similar ideas in the past, every attempt at a substantial unification of nations for that purpose failed completely. Various reasons have been presented as to why the unity of these peace endeavors was disrupted. Greed, short-sightedness, intrigue, and economic and political disagreements which could not be settled by arbitration are considered major factors in preventing the creation of any lasting system of international collaboration.

Any study of the problems of peace, however, must involve more than a detailed examination of the obvious causes for war. In no previous world peace association have the great cultural dissimilarities between nations—which are not directly due to conflicting economic and political interests—been given proper consideration. It is for this reason as much as any other that international peace has not endured.

Man has never fully understood the behavior of peoples other than his own. In the course of his cultural development, he seldom found it necessary to associate with

the members of foreign civilizations. As he did not have the educational background essential to international understanding, he could form no sound conceptions of peoples in other parts of the world. Thus he acquired many nationalistic prejudices which were further aggravated by a perplexing variety of languages. Dominant politicians, in striving to satisfy their own ambitions, have been able to build up violent emotions of fear and hatred by playing upon man's inherent distrust of that which he could not understand.

Upon the realization that it is this lack of international understanding which has been a great barrier to world unity, it becomes obvious that there must be a gradual enlightenment among peoples as to existing conditions, and their causes, in all countries. Some progress has been made along these lines in the work of international organizations which have facilitated the exchange of professors and students between different countries. The chief handicap with such attempts at international enlightenment is that their activities have been too restricted. Since they have been nothing more than a voluntary addition to higher education, their influence upon the greater masses of people has been practically non-existent. Negligence of this sort in a future world

would, in time, prove disastrous for we would be overlooking the fact that it will be the common peoples of the earth who will consolidate the final unity of any international peace association.

If the peace we want is to be based upon the stable foundation of mutual understanding, the individual nations must undertake to achieve it by utilizing the potential influence of their entire educational systems. All subjects as interpreted in the schools must emphasize their related importance in international affairs. All means of education must be employed to prevent a vague, unthinking "internationalism" from blinding us to the realities of peacetime collaboration between nations.

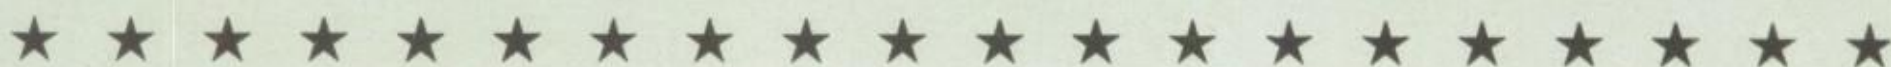

In our own United States we find the moral and intellectual force and the practical experience in democratic education which makes our nation capable of leading mankind in developing the desired international understanding. America has shown that with a proper educational background and the removal of major economic problems it is possible for different peoples to live together in comparative peace and harmony. The world can well follow the example of the American people in subordinating conflicting national ancestries and racial differences to the interests of establishing a just and enduring world order.

Although international understanding is of greatest consequence in the attainment of world unity, I do not intend to overlook the importance of eliminating major international economic and political issues as specific causes for war. During the post-war era, our leaders will be occupied with the task of constructing vast world machinery for that purpose. In the interest of the great majority of peoples involved, there will be great changes in the economic and political structure of the world. Nations have become so dependent upon each other for their material well-being that the desirability of unlimited national

authority, in this respect, is passing. Any international system by which nations are allowed absolute freedom to pursue their national interests, without regard for others, will only breed more of the kind of aggression we are now trying to destroy. The countries of the world must have easy access to the raw materials and world markets which they need for their economic prosperity. In the international disagreements which might be forthcoming, nations, acting individually, must not have the right to use military force in determining the validity of their conflicting claims. All such disputes must be submitted for arbitration to the judgment of the whole community of nations.

With the necessary groundwork of international understanding, we have every reason to hope that our age-long dream of a peaceful and secure world will be realized. This time, our efforts will be supported by the combined wills of all peace-loving peoples. The benefits of the great advancements in science and methods of communication will be at our disposal; and there will be the spirit and vigor of an educated youth to extend that desire for peace to the coming generations.

We, the youth of today, have no desire to suffer from the debacle of another purposeless peace such as followed the last war. Realizing our international responsibilities in the world of tomorrow, we see that a policy of isolation cannot possibly succeed in keeping world order. We accept the interdependence of nations as inevitable in a modern age and demand the establishment of some system of orderly relations between them. The peace we want must contain the conditions of economic and political security for all nations and be based upon the principles of liberty for which freedom-loving peoples fight. These are our convictions; we must support them with the strength and determination of free men.

 Sam Geroules..... *Fire Marshal*
 Charles Axelrod.... *Judge of Superior Court*

★ "Of the people, by the people, and for the people"—those historic words spoken over seventy-five years ago are exemplified here at Crane where we are justly proud of our fair democratic form of student government.

The five major offices of our student government consist of the Mayor, Judge of Superior Court, Fire Marshal, Commissioner of Department and Commissioner of Activities. The governing body of our student government is called the Student Council. It is the function of the

council to pass and carry out rules and regulations which will promote the general welfare of the school.

The student council not only decides the various school activities and their problems, but is also called upon to elect the aforementioned key officers. The council is made up of two representatives each from the 1B, 2B, 3B and 4B classes and 4 representatives each from the 1A, 2A, 3A and 4A classes. These numbers are determined by the relative membership of the classes.

GOVERNMENT . . .

HALL GUARDS

★ One of the essentials of a fine school is an efficient and active hall guard system. Such a system promotes promptness, and aids in the protection of public and private property. It assures quiet halls which give the school the proper business-like atmosphere and enables teachers to conduct classes without any outside disturbance.

This organization is continuing to do now, as it has in the past, an admirable job on the home front. The sponsor of this important group is Mr. Charles Randolph.

COURT STAFF

★ Dealing out punishment to Crane's lawbreakers is the job given to the Court Staff. Working hand in hand with the hall guards, the Court Staff has gone far in strengthening Crane's Student Government.

Craneites who are arrested are notified to appear in Court at a definite time. Each defendant is given a fair trial according to purely democratic rules.

Operated entirely by students, the Court Staff has proved very efficient in reducing the number of offenses committed.

Many Craneites have become conscious of the fact that we must live according to rules, devised to benefit the majority of the people, or take the consequences.

CRANE TECH *Chronicle*

★ An essential part of every Craneite's daily program is the Crane Tech Chronicle, published four of the five days of the week. Who says so? Why, ask any of the 3,500 boys who subscribe to it!

Year after year, press associations acclaim the Chronicle as one of the best high school dailies published, so it is not a matter of luck or coincidence that the Chronicle is such a splendid paper, but a lot of hard work and effort behind it.

An all around coverage of all events happening at Crane is assured by the layout technique that is employed. The first and fourth pages are concerned mainly with the important news events happening every day. The third page is given over entirely to sports, splendidly covered by the sports editor and his staff of assistants.

The second page is the feature page. Here the student may express himself in any way he desires; here the editor puts forth his views on whatever subject pops into his feeble mind, and

here the corniest of jokes and the wisest of sayings are printed.

Like most metropolitan newspapers the Chronicle has a separate staff to handle the business affairs in addition to the regular news staff. Each reporter's assignments are put on a chart and checked off as each one is handed in. The business department takes care of the money collections, bills to be paid, and the student subscriptions.

Much of the credit for the success of the Chronicle goes to the linotype and print shop boys who set up and print it each day so as to really prove its title of, "Written and Printed by, for, and about Boys."

Under the capable guardianship of Miss Margaret Mills, the Chronicle has forged ahead steadily to capture an All-American rating from the N.S.P.A. which it did last semester. Last year the Quill and Scroll awarded the Chronicle the Gallup Award given for advancing the war aims of the school and community.

Science and Craft . . .

★ Another semester comes to a close and the Science and Craft appears again, reviewing the events of the past year.

For the greater part of the year the S. & C. room has been blissfully quiet and peaceful. Then, as April and May roll around, activity in the staffroom grows more and more furious. A deadline has to be met! The editors work frantically making layouts, the business staff collects money and checks and re-checks its accounts, and the literary staff produces writeups in a steady stream.

Each group works at its task and tries to complete the job as quickly as care will permit. Writeups, layouts and cartoons pile up in ever increasing numbers. Then comes the greatest task of all, the fitting together of these component parts into a single compact unit. The final result is the yearbook you are now reading.

The members of the Science and Craft Staff hope that you who read this book get as much enjoyment from it as they did in making it. The book would not have been possible had it not been for the firm but gentle guidance of Mr. F. P. Kehoe, adviser. To him go our heartiest thanks and sincere appreciation.

Crane BAND . . .

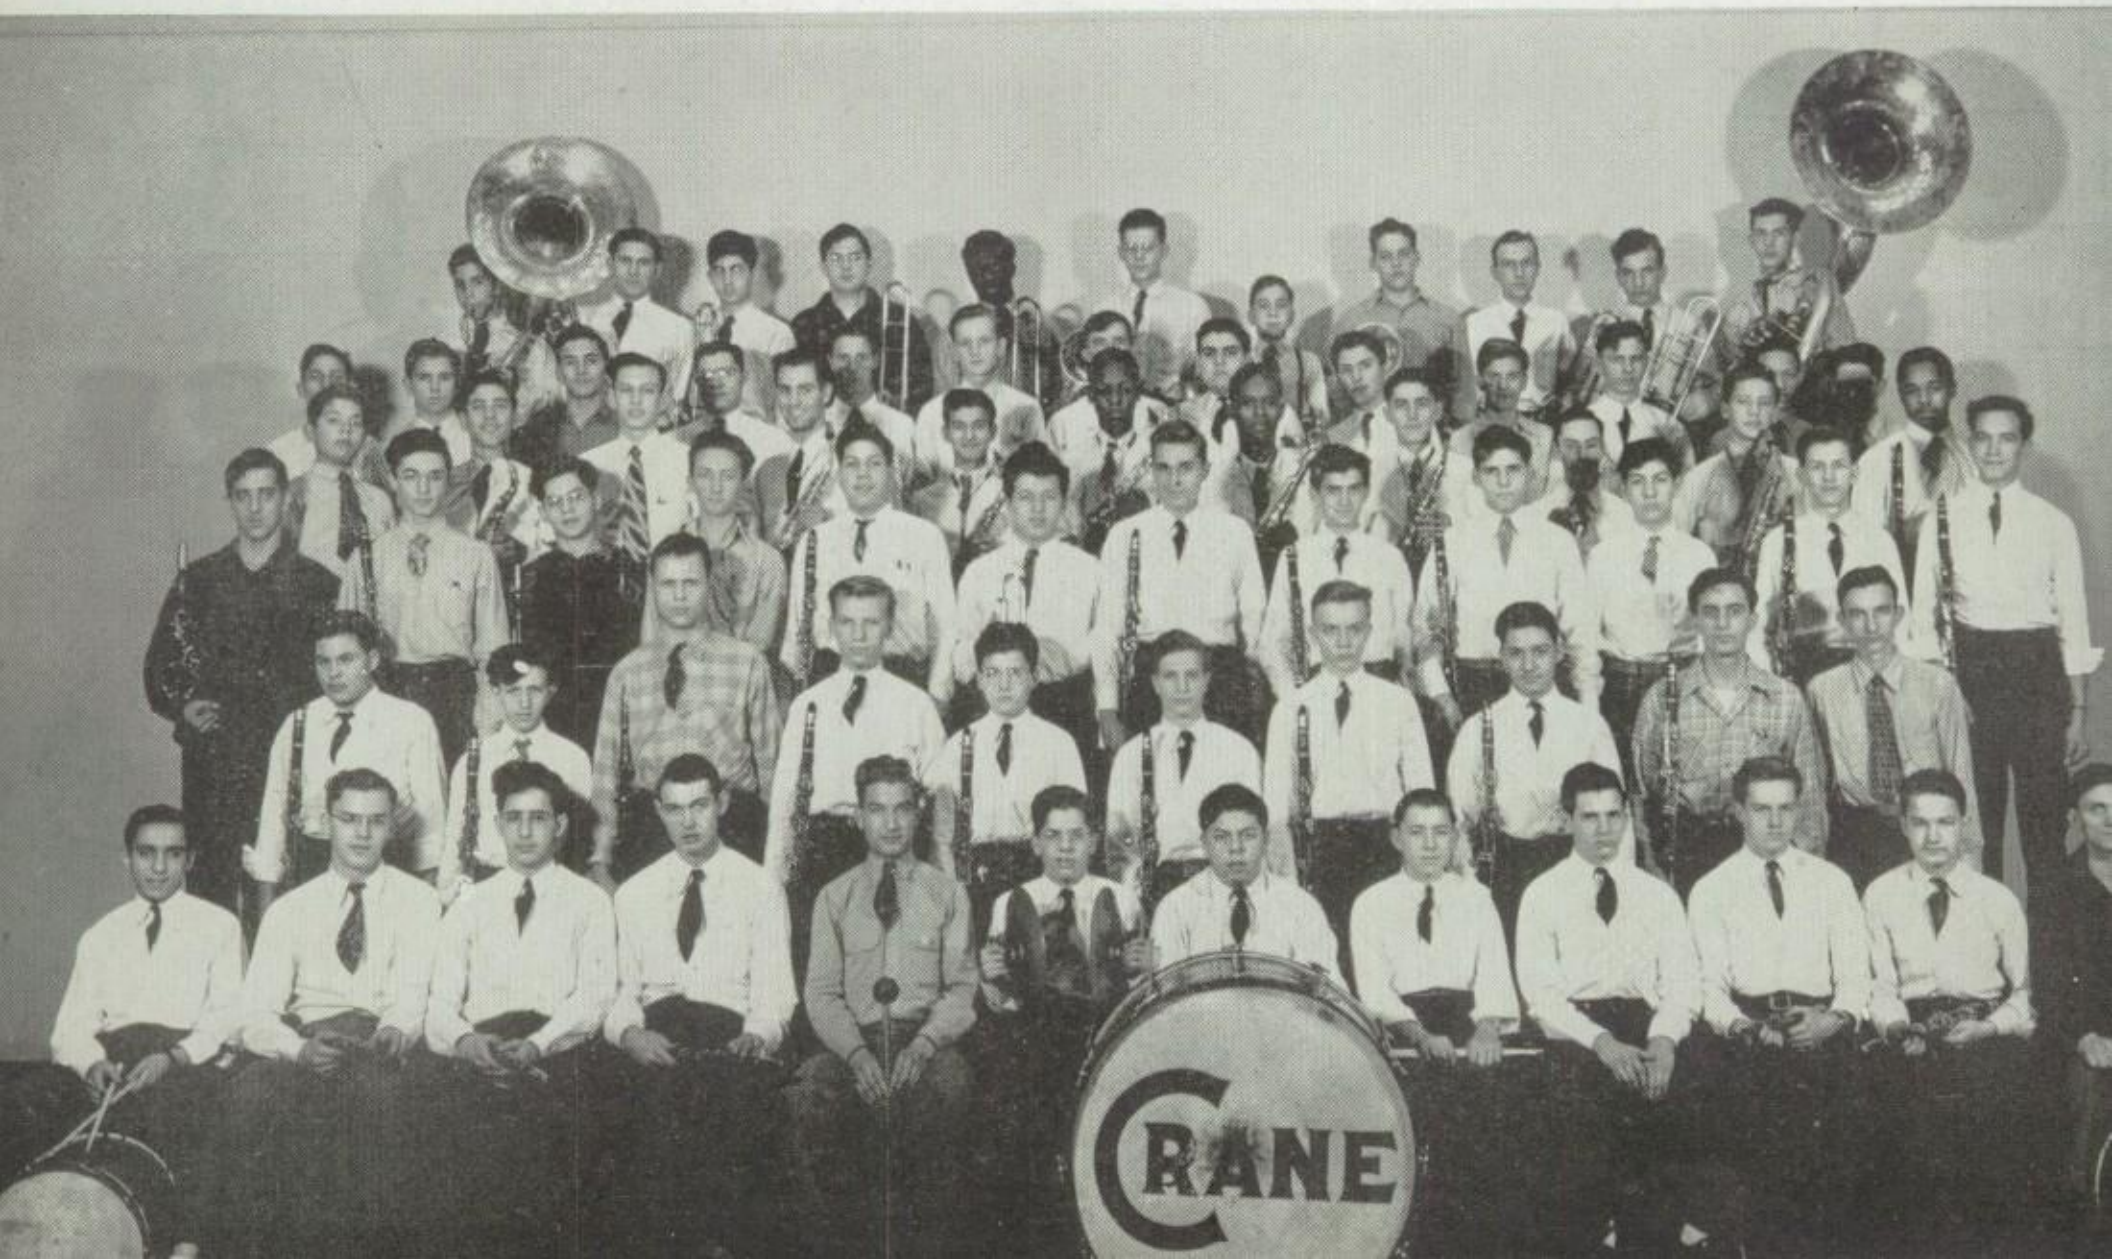

★ The Band is another one of Crane's numerous educational features. It is connected officially with the R.O.T.C. and participates in various occasions which may or may not include the R.O.T.C.

Students enrolling in the course are graded according to their ability and are placed in intermediate or advanced groups. Incidentally the instruments used are the private property of the students. Captain Butler is the musical instructor. His room location is very unusual, indeed. It is the only classroom on Crane's mysterious fifth floor! Many a time a Freshie has been directed by students to Room 500. It's great fun to watch the bewilderment exhibited by the puzzled Freshie as he discovers that there really is a Room 500, when he thought going up those stairs would only prove that he was a good sport and could "take a joke" when played on him.

The constant practice of the band is clearly audible in the halls near and about the room. Such practice shows up in any social occasion where good music is essential.

Crane ORCHESTRA . . .

★ Established for those Craneites wishing to learn to play some musical instrument, the Crane Orchestra has long been one of the school's favorite organizations. Besides offering many opportunities to the musically minded of Cougar Town, the orchestra strives to promote "music appreciation."

By performing at most of the school's assemblies and other activities, the members receive valuable experience. One of the more important events, toward which every member of the orchestra looks, is the annual spring operetta. Combining the orchestra with the singers and chorus, the boys have produced many worthwhile operettas.

The only requirements for joining the orchestra is a willingness to learn and to cooperate. If a boy doesn't possess his own instrument, he may rent any one which he thinks he'd like to learn to play. The beginner is advanced according to the progress he makes with his instrument. As soon as a boy's playing satisfies the instructor, he is placed in the advanced group.

One of the greatest assets a person may have is the ability to play some musical instrument. Although many people go through life without possessing this ability, no Craneite can ever say he didn't have a chance to acquire this ability.

BIG BROTHERS

★ A club for the more industrious Craneites is the Big Brothers. The members are composed of boys in their junior and senior years who have maintained an excellent scholastic average and a superior trait rating.

One of the club's most important functions is its job of acquainting freshmen with our school. Every freshman section has a Big Brother assigned to it. His duties are to familiarize these future citizens of Crane with the student government, the numerous clubs and all of the other extra-curricular activities from which they may benefit.

The Big Brothers have been an asset to Crane and have truly devoted a great deal of service to make ours a better school.

CRANE TECH CITIZENS

★ The Crane Tech Citizens are composed of students having a 1.5 average in trait ratings and also a 2.5 rating in scholarship. Each student is required to have performed some service to the school such as hall guard, lunch guard, or after school teaching.

The organization unites these students in order to improve school conditions. They are constantly on the watch for situations which may be corrected.

Membership cards and buttons are issued to qualified students each semester. The buttons and cards have a number which signifies the number of semesters the student has been a member.

CRANE TECH SINGERS

★ "Music Charms," and so, indeed, do the Crane Tech Singers. Under the capable baton of Mr. Lewys Thomas the club has mastered a wide repertoire of inspiring selections. The harmonious blending of voices ranging from tenor to bass has entertained us during many assemblies and other programs. Resplendent in their red and blue gowns, the Crane Singers have helped us Craneites further appreciate fine music.

Until the days of glorious peace, when music will again come into its own, the Crane Singers will not appear as a group to entertain various organizations as was their custom. Instead, they have dedicated their after school hours to war work.

Thus in peace and war the Crane Singers deserve our heartiest praise.

CRANE CHORUS

First Row: Leighton, Wickey, Kawa, Fineberg, Levi, Reinisch, Tifalshi, Feingold, Lindy, Stein. *Second Row:* Gurko, Lichner, Haber, LeVine, Kucera, Gelman, Katz,

CRANE CHORUS

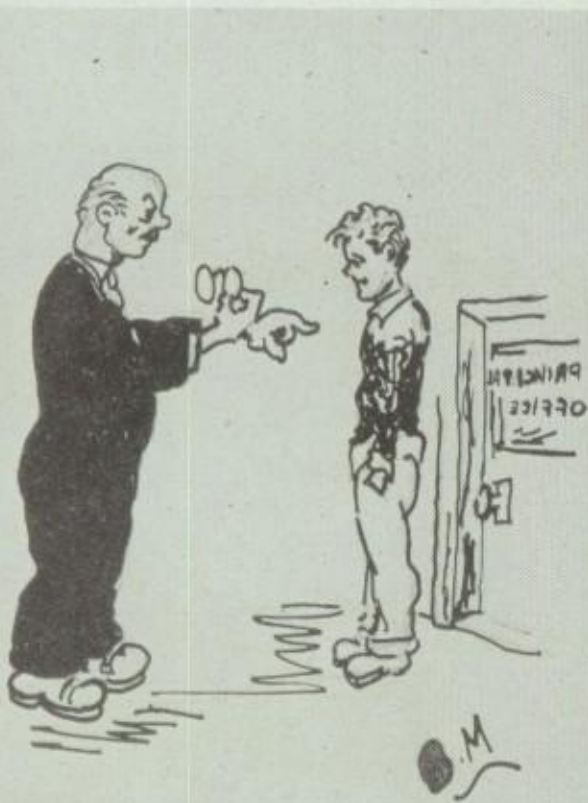

★ Whose voices are those that fill the assembly hall with harmonious melodies at Christmas time and on other important holidays? What organization is called upon to make different events around Crane musically successful? The Crane Tech Chorus is the answer to these questions!

Any Craneite who enjoys singing and wishes to learn a little about the history and finer points of music may join the Chorus. Under the direction of Mr. Lewys Thomas the boys' voices are trained to harmonize with each other.

The superior ratings given to the Chorus in almost every contest they enter is their reward for the enthusiasm which they show and the effort they put into their work.

Persin, Stech, Kawalek, Morris. *Third Row:* Massari, Santoro, Gaudio, Welkovitz, Zeiler, Memmini, Feeke, Best, Smulevitz, Keller, Duncan, Opal, Alton, Schwartz.

SMITH-HUGHES ELECTRIC SHOP

★ Under the able direction of Mr. Witte the boys of Smith-Hughes Electric shop are really setting examples for future students who choose this course. Due to the war, the boys are handicapped in securing the necessary materials.

Before the war the boys would build their own transformers and receivers. With an enrollment of twenty-five boys, each one chooses what he wants to make within the limits of material now available. Some of the things made these past semesters are radios, fluorescent lights and motors. A student may elect to take Smith-Hughes Electric shop in his 3B semester.

SMITH-HUGHES RADIO

★ For several years, one of the preferred courses at Crane has been the Smith-Hughes Radio. Now, more than ever, with wonderful new Radar being used as a powerful war weapon and with television coming into its own, a larger number of Craneites have been taking this elementary radio training with the hope of breaking into one of these fields.

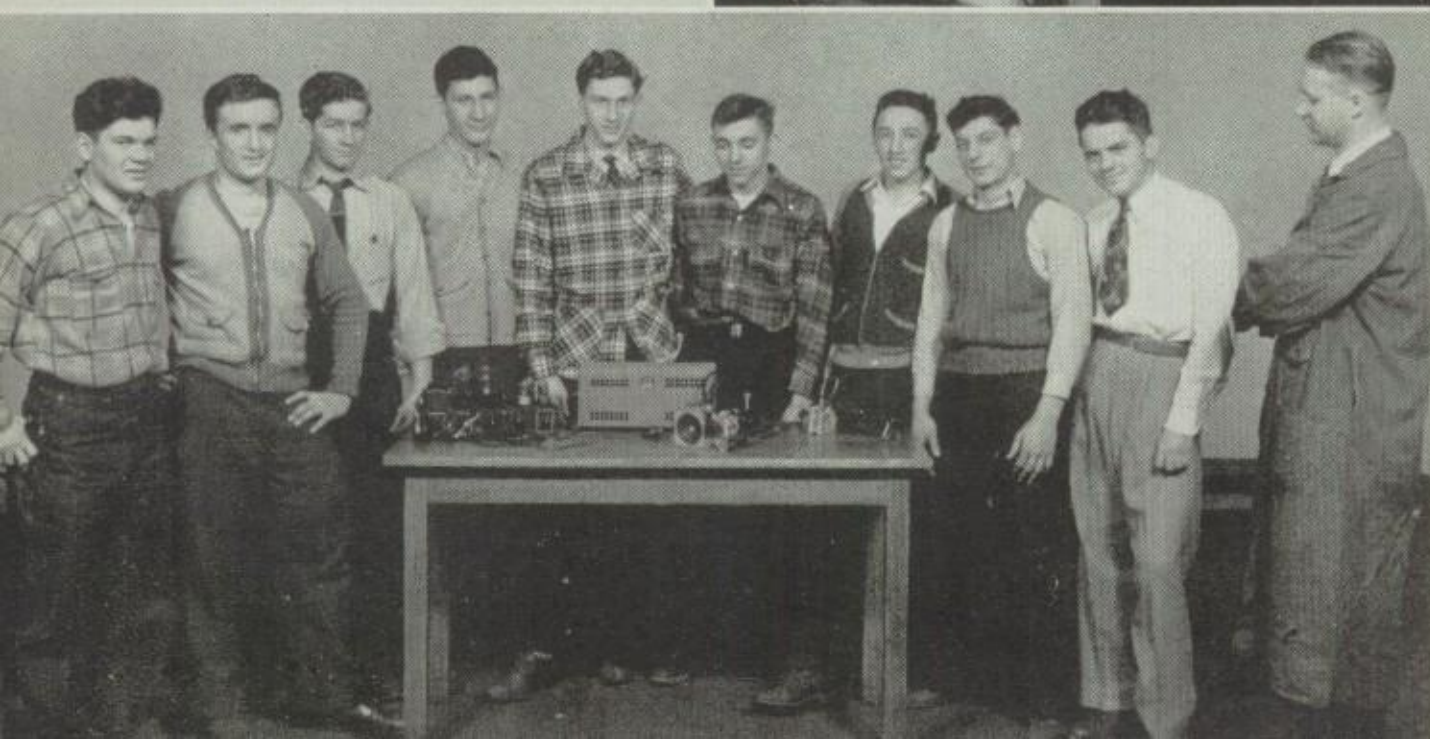

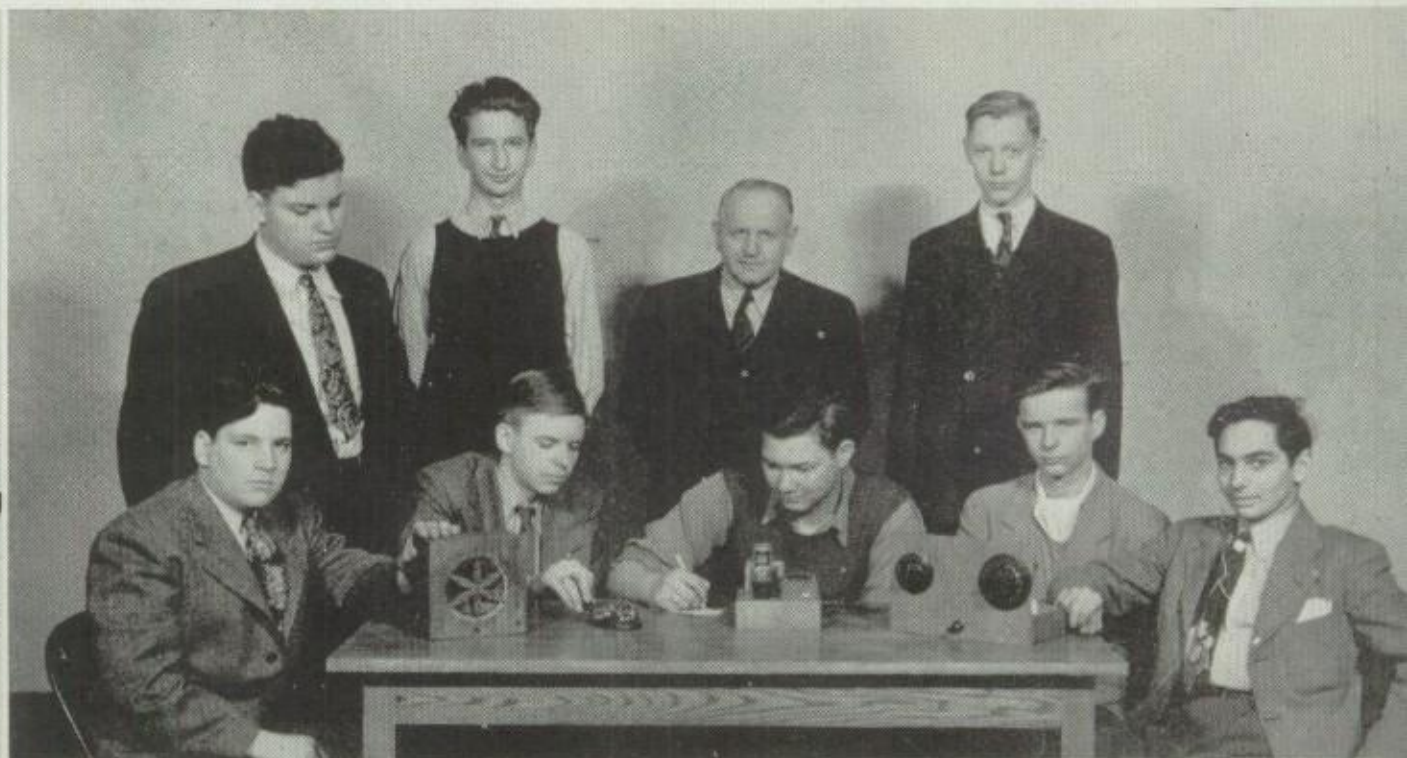

Smith-Hughes Radio students spend half of each day in the shops where they learn the skill of setting up and tearing down different types of radio equipment. The rest of their time is spent in special mathematics, social studies, and English classes.

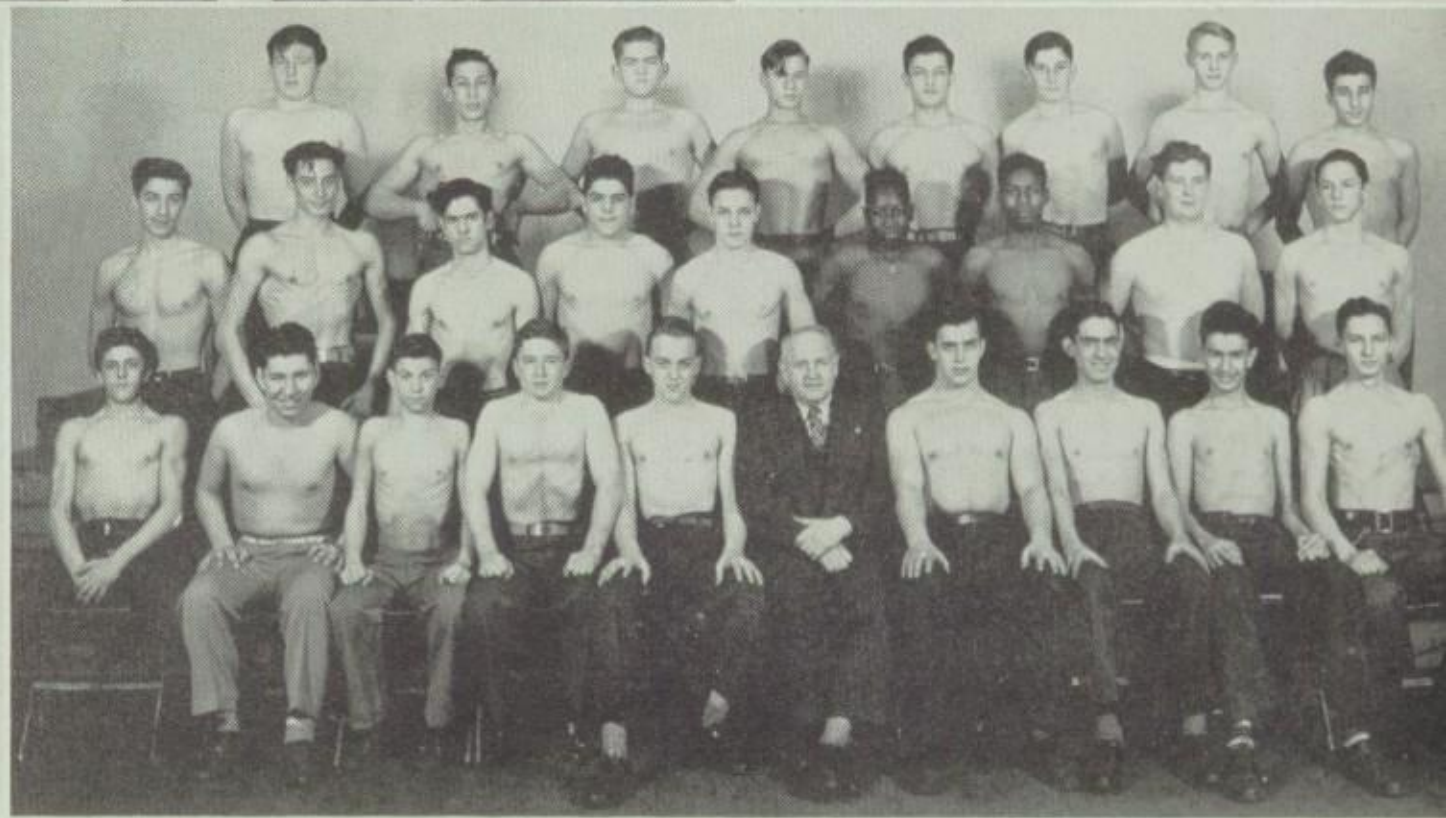

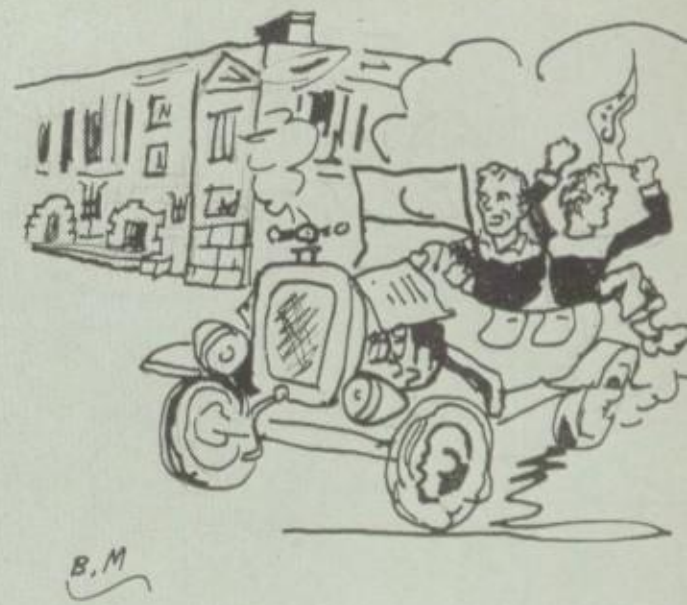

Craneites completing this two year course successfully are ready for radio service either in the armed forces of Uncle Sam or in the world of industry.

MOVIE OPERATORS

★ The Movie Operators' organization is one of the most interesting groups in the school. After a brief course in the operation of the projectors, the embryo movie operators go out on their own. When they have gone through the ordeal of reversed films, stuck speed controls, short cords and countless other obstacles, our young movie operators become full-fledged veterans. A minor credit is given for each semester of service. Three semesters of good service produce a movie operator's pin as a reward. This group is sponsored by Mr. Dallas Puffer.

WEIGHT LIFTERS

★ With but one purpose in mind, the Crane Weight Lifters are determined to develop themselves into strong, healthy Americans. In this way they will be a greater asset to their country when they become members of the greatest team the world has ever seen, the armed forces.

With an increased membership, and an enormous waiting list, the weight lifters under the sponsorship of Mr. Pettet and Mr. Malo have advanced by leaps and bounds until today we find them one of the top organizations here at Crane. The work they are doing is an invaluable contribution to the war effort, for if we are to win this war we will need fighters in absolutely top physical condition.

ART STAFF

★ Possibly by this time you have noticed the handsomely colored posters in the halls of our fair school. The purpose of these posters is to encourage the students to indulge in the various activities which the school offers. This work is done by the modern Rembrandts of the Art Staff.

The Art Staff's main task is to issue publicity for the various clubs, organizations, committees and school affairs, in the form of beautifully colored posters.

Portraits of various members of the faculty and student body are also executed by these budding young artists. Membership requirements are an interest in art and some degree of talent which co-sponsors Mrs. Diaz and Mr. Overholser hope to develop further.

ART CLUB

First Row: Cerino, Raio, Mores, Mansueto, Korach, Block, Mizrahi, Waller, Binnstock, Deitchman. *Second Row:* Lucches, Krulik, Mortell, Mey, Olsiewicz, Sompolski, Neil, Mr. Overholser. *Third Row:* Standard, Robinson.

PAN-AMERICAN CLUB

★ These days, when inter-American relations are constantly in the news, the Pan-American Club assumes a greater significance than ever.

It is the purpose of the club to promote good will toward our Latin American neighbors. This is accomplished by acquainting the club's members with the habits and customs of our friends to the south. Members acquire a broadened outlook because of their work in this field.

The club, sponsored by Miss Diaz, meets in Room 453 on alternate Wednesdays when studies of the various South American countries are made. Material for these studies is supplied by the Co-ordinator of Pan-American Affairs.

PAN-AMERICAN CLUB

SMITH-HUGHES LINOTYPE

★ Members of the Smith-Hughes Linotype class not only aid the school by setting up the Chronicle and doing other miscellaneous printing jobs, but they are also receiving valuable training in an important field.

The new students are "broken in," or made familiar with the keyboard, by practicing on a dummy. As their skill increases, the difficulty of their task is increased also.

They are trained in the mechanical operation of their machines so that they are able to make minor repairs and adjustments without stopping the work for too long a period of time. The class is attended for three hours a day as are the other Smith-Hughes Courses.

SMITH-HUGHES LINOTYPE

SMITH-HUGHES PRINT SHOP

★ Students taking Smith-Hughes print shop are preparing themselves for a future position in the commercial world. The three hours a day for two years which they spend on this subject make them familiar with the machinery and technique used.

The students who take this course are given every possible opportunity to become thoroughly familiar with their work. This practice results in the production of well trained apprentices by our print shop. Non-college students would do well to provide for their future by learning a trade now, while they are in school. In the post-war world, only trained men will be considered for jobs.

SMITH-HUGHES PRINT SHOP

OWLS HONOR SOCIETY

★ The Owls Honor Society has endeavored to raise the scholastic average of Crane by giving the students a goal for which to work.

To become a member of this exclusive organization a student must have a straight S for at least one final marking period and thereafter must maintain at least an E average for each final marking period. The club sponsors an after school class at which its members assist fellow students who need help in their various studies. The student teacher must attend the after school class at least twenty times in order to become a full fledged Owl. Upon becoming a full fledged Owl he is presented with an After School Teacher's pin and an Owl's pin. The club is under the capable sponsorship of Miss Dorothy Littleton.

OWLS HONOR SOCIETY

NATIONAL HONOR SOCIETY

★ The Crane chapter of the National Honor Society has brought to an end its twenty years of faithful service to the school.

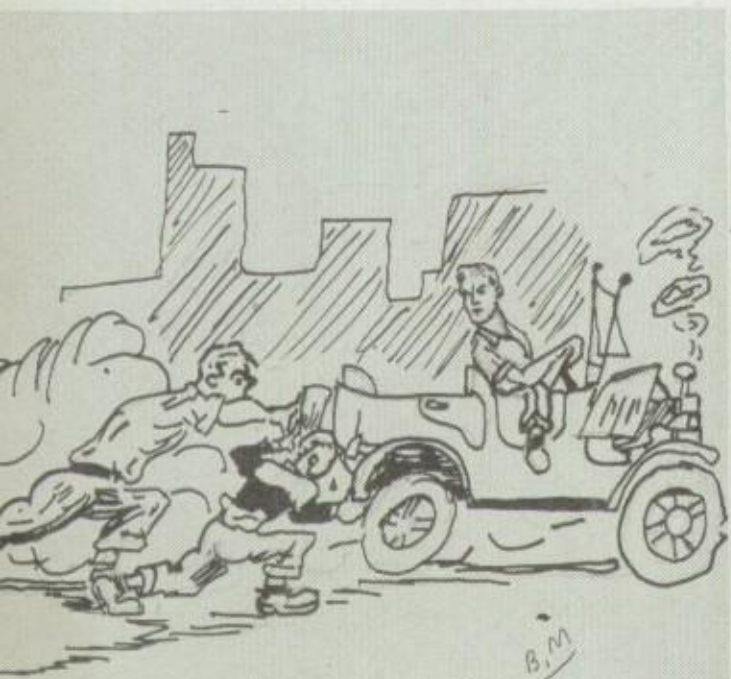

This select group of students is made up of 3A, 4B and 4A boys who meet the following qualifications: The applicant must be in his 3A semester and must have at least an E average for his final markings, starting from his 1B semester. Beside the scholastic standard, the student must have a 1.5 trait rating average for his entire attendance at Crane and must also be active in extra-curricular activities.

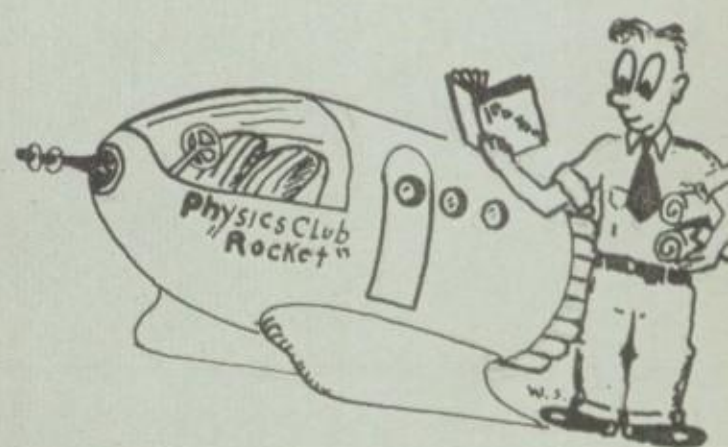

It is the purpose of the National Honor Society to raise the standards of Crane as a whole. The club is under the sponsorship of Miss Regina Devine.

NATIONAL HONOR SOCIETY

First Row: Ranieri, Duncan, Scott, Kamberos, DiGregorio, Pospisil, Lucente, Dini, Ivaska, Hadac, Pederson. *Second Row:* Donatelli, Polach, Placek, Silber, Norini, Langer, Cohen, Weiner, Palumbo, Miss Devine. *Third Row:* Sompolski, Stahl, Semmler, LaRoussa, Langhans, Gianacopoulos, Gerst, Zahradnik, DiFonzo. *Fourth Row:* Komarek, Weiderman, Treml, Baskovitz, Piech, Jaslowski, Smulevitz, Silverberg.

What Now?

LUNCH GUARDS

★ The Crane lunch guards under the supervision of Mr. Harrington have brought the lunch room up to a very high standard these past semesters. They have been functioning smoothly and very efficiently. Lunch guards have helped a great deal in keeping order and enforcing the lunch room rules.

During the three lunch periods each day a new group of lunch guards officiate. Each group is supervised by a captain who is aided by his six lieutenants. Mr. Harrington is also there with a few of the other teachers to help the boys along.

LUNCH GUARDS

First Row: Fron, Papp, Menegazzo, Minerva, Nach, Mr. Harrington, Donatello, Stein, Machnikowski, Janiczek, Avner, Aubele. *Second Row:* Crim, Maulsby, Karac, Krajcovic, Arkin, Morris, Pacillin, Swanson, Roberson, Rowan, Dudley, Smith, May, Vizzone. *Third Row:* Budish, Wood, Reisberg, Vondrak, Reiter, Baime, Yablon, Swenson, Haacker, Larks, Texler, Gold, Elrich, F. Lucente, Goldberg, Stolspart. *Fourth Row:* Basta, Carl, Tristano, Orlov, Berlowe, Martin, Sujak, Hayer, Cichon, Cloonan, Gandy, Rizzo, Kusnetz.

PHYSICS CLUB

★ The purpose of the Physics Club is to provide the interested student with a means of increasing his knowledge of this fascinating branch of science. Membership is open to anyone interested in physics or any of its related fields. At meetings, members review particular subjects which they consider worthwhile, and give lectures to the other members. Material on physical subjects which cannot be covered during ordinary class work is analyzed and discussed. The club meets in room 424 every other Wednesday under the sponsorship of Mr. Rennison and Mr. Chaney.

PHYSICS CLUB

First Row: Trozzolo, Lipin, Alterman, Scott, Bautista, Semmler, Mr. Rennison, Chaney. *Second Row:* Konovsky, Tuchman, Culhane, Lescher, Jacobson, Smulevitz, Riva, Kolberg, Duncan. *Third Row:* Gerst, Woods, Haacke, Novak, Weiner, Best.

SLIDE RULE AND MATH

★ Open to all Craneites seeking a more thorough knowledge of mathematics, is the Slide Rule and Math Club. Learning to operate and to understand the theory of the slide rule is only one of the advantages offered to members of the club. Practical applications of mathematics and problems which cannot be worked in the regular high school course are stressed by Mrs. Springer, the club's sponsor.

With the great demand for mathematically trained men in industry and the armed forces, the Slide Rule and Math Club should be one of Crane's most popular clubs.

SLIDE RULE AND MATH

First Row: Mauriello, Smith, Shetsky, Allen, Palumbo, Baughman, Brozman, Wyroski, Rushakoff. *Second Row:* Fortino, Haines, Berland, Weiss, Fishman, Jancik, Schab, Mark, Rovin, Standard. *Third Row:* Langer, Baker, Nicholas, Larks, Carter, Sterling, Culhane, Felice, Axelrod, Overton.

CHRONICLE AGENTS

★ "Agent" is defined as, one who acts. Each and every Chronicle Agent in Crane is a living symbol of this word, as he is constantly, unceasingly, providing the members of his division with copies of the Crane Chronicle.

They strive to and usually succeed in obtaining and maintaining one hundred per cent support of the school paper.

Such support is not hard to understand since the school paper is among the best published in any high school in Chicago.

A unique system has been devised by which payments for the Chronicles are made. If one pays up early, the Chronicle costs less than if one waits until the end of the semester.

CHRONICLE AGENTS

First Row: Lewandowski, BelMonte, Amato, Cohen, Belpedio, Palmieri, Martino, Porter, Morris, Belayis, Gagliano. *Second Row:* Mirochwick, Wilkoz, Klubeck, Rabinowitz, Ferrara, Lucia, Albertini, Anast, DePasqua, Barker, Pouloupoulos, Vizzzone. *Third Row:* Lescher, Becker, Adriani, Berkowitz, Mottlowitz, Walksler, Duncan, Ivaska, Gerst, Overfield, Newmyer, Schweizer, Zalermini.

BEN FRANKLIN

★ The Ben Franklin Club was organized in 1926. It is one of the largest and oldest clubs in Crane. The club is composed of boys taking printing and is affiliated with the Graphic Arts Student Guild. The club's purpose is to create a larger interest in the higher branches of the printing field.

The Ben Franklin Club is noted for its annual skating party, which highlights an entire year's work and has been a huge success ever since its inauguration. Last year the skating party was the biggest affair of its sort in the history of Crane, having approximately 935 skaters attending this gala, and they all had a wonderful time skating and listening to the music of Russ Young.

Each year the club enters a display in the annual Inter-Club day exhibition, illustrating and explaining the processes concerned in the production of printed material used in the school such as posters, pamphlets, and the school paper, the Chronicle.

The boys are given access to all printshop

material and can always obtain assistance from their sponsor, Mr. Kreamer, the print shop supervisor. The membership in this club is based on scholarship also, a member must have at least an E average in print shop for the final mark.

SMITH-HUGHES MACHINE SHOP

★ In times like these, when war industries are crying for skilled men, the value of specialized training in machine shop practice becomes greater than ever.

At Crane, students may take the Smith-Hughes Course and spend three hours a day for two years at their chosen work. As in the other Smith-Hughes Courses the rest of their program consists of related subjects. Machine shop classes alternate so that all students receive both bench and lathe work.

Craneites who are eligible and who are not planning to go to college should take advantage of this excellent opportunity.

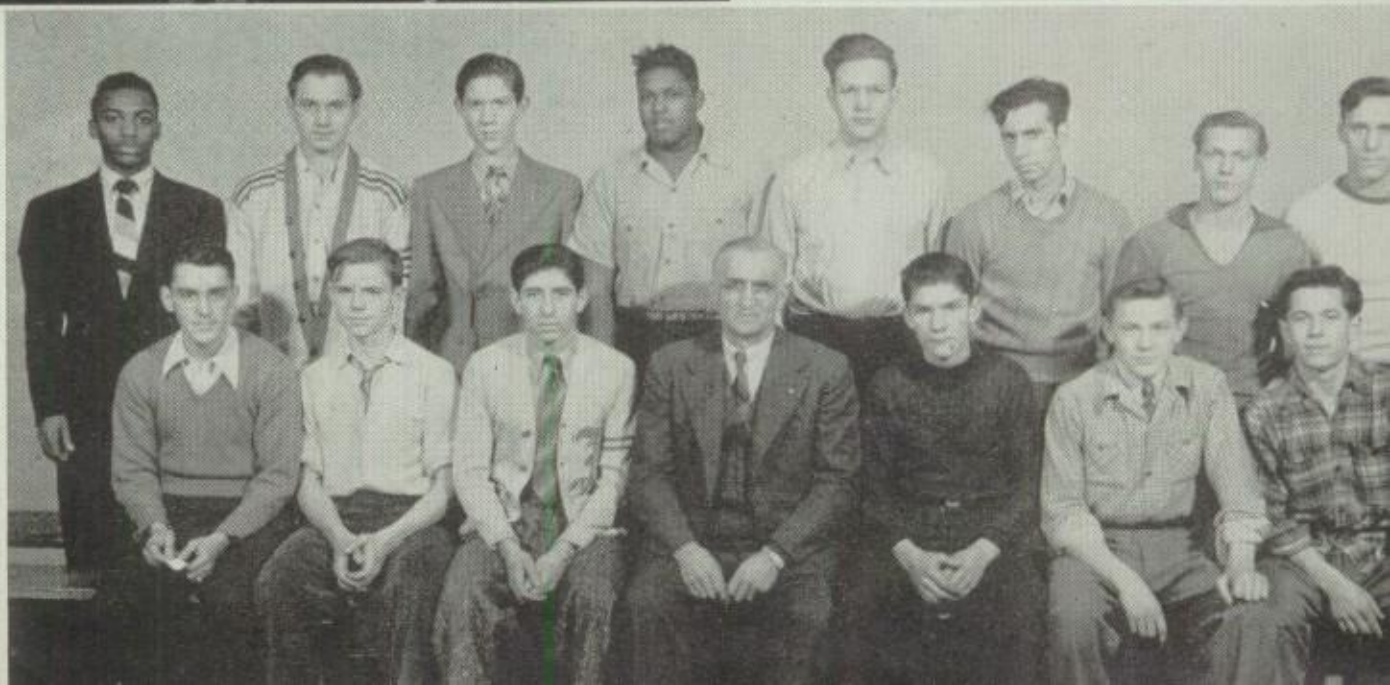

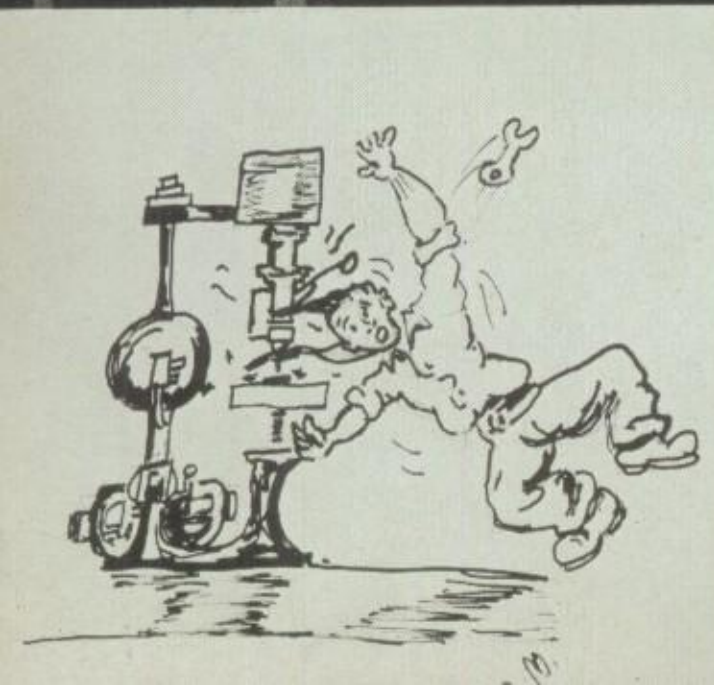

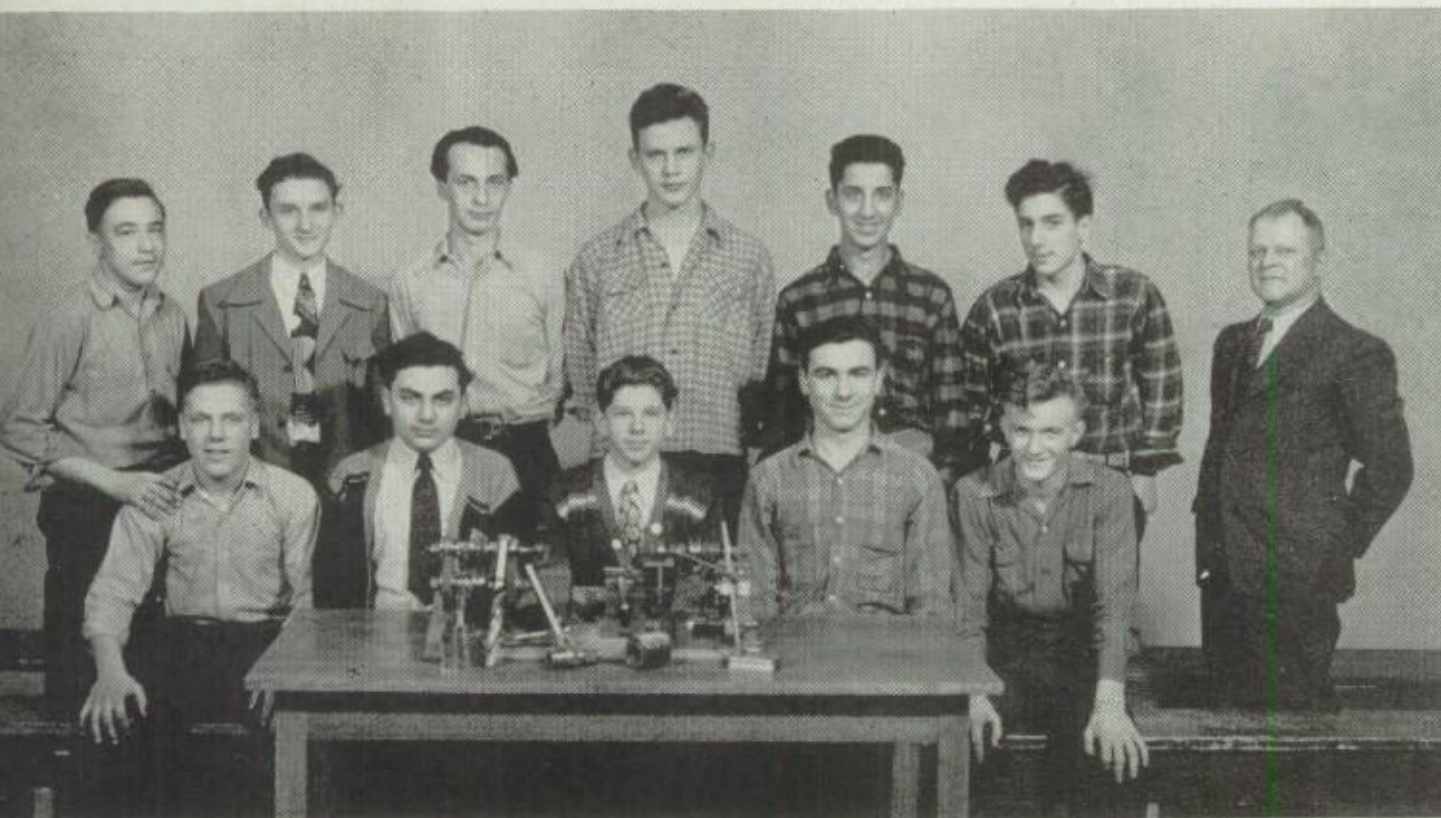

SMITH-HUGHES MACHINE SHOP

ACCORDION CLUB

★ The Accordion Club is one of Crane's most popular clubs. Members of this group, sponsored by Miss Norma Fornaciari, are always in demand for assemblies and special programs. The members of the club perform a valuable service to the school and at the same time gain experience which will benefit them later on in life.

To become a member, a student must own an accordion and know how to play it. The club always enters the annual Inter-Club Day program in which it has taken high honors in the past and will again, undoubtedly, in the future.

ACCORDION CLUB

First Row: Fiore, Shok, Matulik, Palek, Anast, Olsen.
Second Row: Weigel, Palermini, Schone, Bobis, Spino, Orto, Costantino, Guskiewicz, Miss Fornaciari.

RED CROSS

★ The Red Cross is an organization which performs a great service to mankind in peace, and during wartime does heroic work in easing the suffering of innocent people. They have, and well deserve, our heartiest thanks for the wonderful job they are doing.

The Crane Chapter of the American Red Cross has admirably done its part in helping to provide funds for the continuance of this work. Both students and teachers have contributed liberally to this good cause. For those of us who cannot be at the fighting fronts, the Red Cross acts as a messenger—a messenger from home.

ZOA-PHYTA CLUB

★ The Zoa-Phyta Club is one of the oldest clubs in Crane. It was originally organized for biological work alone; but for the last few years its members have carried on work in all of the major branches of science. Members of the club meet in room 302 every Monday, Tuesday and Wednesday after school. There they carry out their pet research problems. Business meetings are held in room 301 on Tuesdays whenever the need for them arises. All Craneites from freshies to seniors are eligible to join. The club is under the sponsorship of Mr. Charles F. Dunn.

CHEMISTRY CLUB

★ The Crane Chemistry Club is continuing its excellent work of arousing the interest of the students in this world in which we live. Chemistry students can use newly-acquired knowledge to explore a new world. The field of chemistry contains unlimited opportunities which offer a challenge to our scientists of the future. If one is interested in chemistry, or any of its numerous fields, he would find it enjoyable to join the Chemistry Club and further his knowledge of a rapidly growing science.

The Chemistry Club meets every Thursday in room 353 under the guidance of Mr. Charles Randolph.

SENIOR PROM

★ One of the largest proms in the history of Crane took place at the Knickerbocker Hotel on June 9, 1944. Jiving to the music of Lou Diamond, and his celebrated orchestra, the boys with the red and blue in their heart, enjoyed their last Crane affair with much zest. Much credit for the success should be given to Ben De Simone, Marty Palumbo, Anthony Lucente, Steve Di Guardi, and Montana, the bright spot of the committee. The hall contained more than 500 people, and all were out for a good time. The program was arranged with great foresight, and was very novel. Mr. Bickner, class sponsor, has been a constant friend to the boys, and he, together with many other faculty, wished them a successful, and happy future. The gay time ended, as "Home Sweet Home" was played at midnight.

CRANE BOYS SERVICE CLUB

★ The Crane Boys Service Club was originated in answer to the need for office assistants. Miss Zlatin, sponsor, got the inspiration and with the principal's approval organized the club. It has been of much service to all who need office help. The boys are carefully trained in various office activities. Their fine spirit of cooperation and comradeship can best be seen through their motto:

"All of us together share a common destiny. Whatever happens to one of us, happens to all of us."

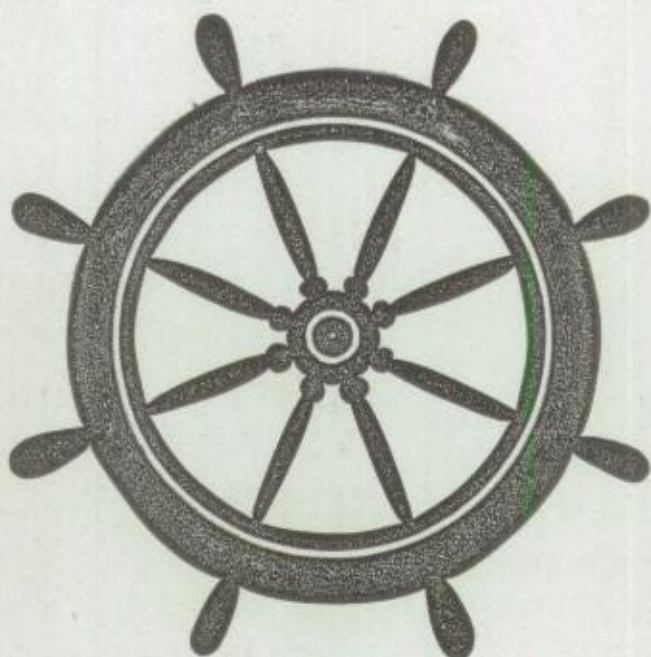

The club does not hold regular meetings.

SEAMANSHIP

The course in Seamanship at Crane Technical High School is one of three such courses being given in the Chicago High Schools under the sponsorship of the United States Coast Guard Reserve (T). The other two classes being at Tilden and Lane and running concurrently with the one at Crane. ¶ "Seamanship," as its name implies, serves the same purpose as the courses sponsored by the C.A.P. and furnishes the young man who is interested in the United States Navy and its work with a good background in such subjects as, "Nomenclature," "Rules of the Road," "Knots and Splices," "Lights for Vessels," "Anchors and Anchoring," "Charts," "The Compass," "Piloting Instruments," "Signaling," "Safety at Sea" and kindred subjects. ¶ Most of the subjects which made up the course were handled by various men who were authorities on the subject about which they spoke and the course itself was supervised by Alden S. Fields, Coxwain in the U.S.C.G. Reserve (T), member of Flotilla 1-8 and a veteran boatman of some twenty-five years experience.

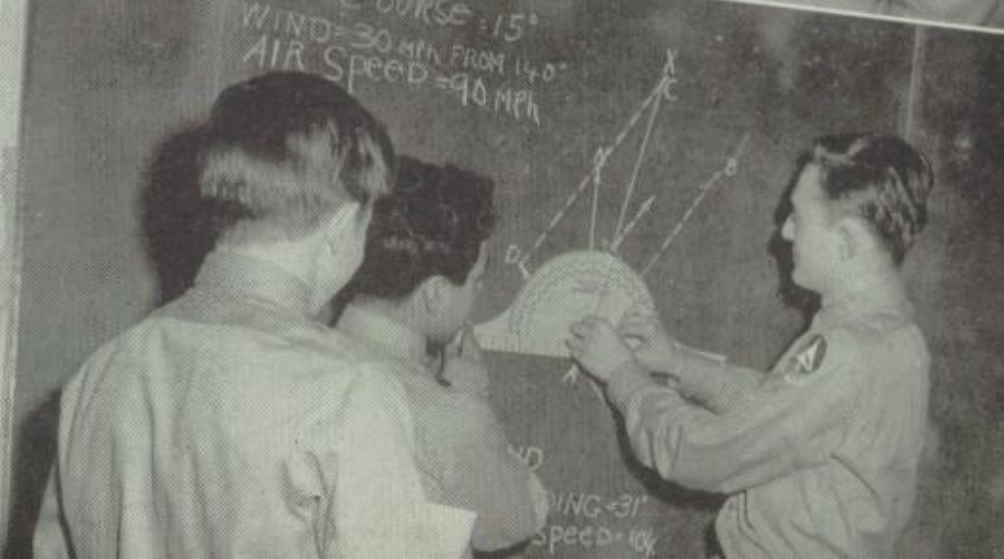

CIVIL *Air Patrol* CADETS

★ Many air-minded Junior and Senior students at Crane are joining the Civil Air Patrol Cadets and taking advantage of the aviation courses offered by the Civil Air Patrol Squadrons based in and near Chicago. The Civil Air Patrol is at present under the jurisdiction of the Army Air Corps and follows the training program set up by it. This program includes a brief basic military course, elementary and advanced ground school courses and training in special types of duty such as airport guard duty, crash crew practice, patrol missions, and communications. Ground school classes are conducted in the city high schools in the evening sessions while other activities are carried out at the various airports.

Crane Civil Air Patrol Cadets, now numbering about fifty boys, represent many of the Chicagoland Squadrons, although the majority of the group are members of Squadron 611-5 based at the Harlem Airport. The Crane group meets once a week after school at Crane for drill and military courtesy and then joins the particular squadron with which they are affiliated for the other classes. Voluntary work in actual patrol and courier service is restricted to senior members but the cadets are preparing themselves in case they may later have the opportunity to participate in such work.

R. O. T. C.

★ Esprit de Corps!! That is the basis on which the Crane Tech R.O.T.C. is being trained to meet its most important event of the year; the annual Federal Inspection. ¶ We can and will strive to attain the supreme goal of taking first place with flying colors. ¶ The purpose of the R.O.T.C. is to teach leadership, dependability, and to make better citizens of all the cadets. ¶ The R.O.T.C. cadet receives a minor credit in place of gym, although once a week they have physical drill. The course of study includes the rifle manual, drill, theory, rifle marksmanship, drill theory, and map reading. In the R.O.T.C. all cadets have an equal chance for advancement in rank.

R. O. T. C. *Rifle* TEAM . . .

★ Ending last season as the National Champs, was the achievement of the rifle team. They entered the Chicago R.O.T.C. rifle matches, and emerged with a record 4,987 points out of a possible 5,000. Next in their stride, they won the 6th corps area championship, running off all contenders. Then came the greatest test. Going down to the range, led by their Captain Gunther Tobleck, the team shot an amazing 498 out of a possible 500. This means that out of all the shots taken, only 2 were not bullseyes. But this national rifle high school championship was not enough for the red and blue shooters. Next they entered in the top rifle event of the United States. This is known as the Hearst Trophy. Competition is supplied by all the sectional High School and Collegiate, as well as amateur champs. The tourney was won by Crane, who won by more than any other team has in the history of the tourney. The team this year has not shot in the tourney yet this year, but we hope they can do as well. For those of the past team, may your shots on the greatest team in the world hit their mark.

Military BALL

★ After months of planning and preparation, on January 15th the Crane Military Ball was launched at 8:30 P.M. with Johnny Jones, the noted band leader conducting. Yes, it was to be the most gala event of the season and it was. ¶ At 10:00 P.M. the lights went on and a line of guidons was placed between the door and the stage. At 10:01, Miss Patricia Wilcynski, the queen, escorted by Cdt. Major Scarim, and her ladies in waiting, Miss Eleanor Curin escorted by Lt. Col. Zahradnik and Miss Doris McNamer escorted by Cdt. Sgt. Wood slowly walked in as the orchestra played "Pomp and Circumstance." ¶ Major Rydel started the ceremony by introducing the queen, her ladies in waiting, and their escorts. After explaining how the queen was chosen, she was crowned with a wreath of roses and she received a watch while her ladies in waiting received bracelets. The R.O.T.C. further expressed its appreciation by presenting all three with bouquets of red roses. Following the ceremony there was a grand march climaxed by the singing of school songs and then the couples went on dancing until the glorious evening ended.

★ Starting the football season by traveling out to Tilden's home grounds, the high spirited red and blue showed great potential strength, although losing to Tilden 20-0. Due to an over-amount of spirit, the Cougars fumbled six times during the game. However, the boys looked like they would develop into championship material, with a little more hard drill.

Next, the Crane team traveled out to Oak Park, to play the well coached, good sports from the suburb. In this game, two stars were discovered. They were the hard tackling Joe Sturgulewski, and slippery running Ray Izzo. The Parkers did it 21-7.

Starting the season off with a bang, the red and blue ran over a much weaker Marshall squad 26-6. Featuring the flashy running of Ray Izzo, who crossed the goal again and again, the Craneites showed what their months of hard training in Douglas Park did for them.

The gold and blue tried hard, but with Villiger pitching them and Hanson, Hanlon, and McVey catching them the Cougartown boy just couldn't be stopped. They did it again 21-0.

With the loss of Ray Izzo to the team, the team had to work with their hearts, and little

5'1" Frankie Monachino, to nose out Harrison 14-7. Little Frankie took Ray's place, and ran his legs off, to reel off one gain after another. The team work was swell, and Crane pulled together to finally win the game.

The stands were calling to Coach Brown to send in the water boy, as the last team ran wild over an extremely weak Tuley team. Many of the boys from Tuley's first team were transfers from Crane. The reason they transferred, was that they couldn't make the red and blue last team. The end of the game found the scoreboard reading Crane 40, Tuley 0.

Coming up against the stellar Steinmetz flashes, the Cougars just didn't have it. The old red and blue fought with their last ounce of spirit and strength, but Mat McCarthy and his teammates were too big. The flashes drew first blood as they scored during the middle of the first half, to take the lead. However later in the game the Cougars came back, with little Monachino running behind huge Al Liccardi, to finally cross that white line. However Steinmetz would not give up their lead, and finally plowed through with a 13-7 victory.

In the muddiest game of the year, Crane walked over Kelvyn Park 39-0. It was an off balance game as the ball would change hands many times during the course of a minute. Other things, like the interception of the ball by Guard Walter Smith, who ran 40 yards for a touchdown, made the game very exciting for the 23 people in the stands. It was a victorious end for a fine season.

Frosh-Soph FOOTBALL

★ The Varsity! That is the goal of every member of Crane's Cubs. The boys have again completed a successful season, taking their old rival Austin to camp along with many other teams. The purpose of this team is to weed out the real material, and send it up to the Cougars. By a series of intersquad skirmishes and interschool games, the trained eye of Coach Horschke picks out the good. These cougars of the future are then sent up to play in practices with the Varsity, where Coach Brown gives the final word. After this tough workout, the frosh-soph practice regularly with the Varsity, and during the following season, carry the colors of Crane into battle.

Seniors . . .

★ Starting off with a bad break, and ending with an even worse one, is about the best manner in which we can sum up the seniors' basketball season. In their first game of the regular season, the team was without the service of Frank Dankus, who went for his induction physical. The game was against Wells, and the red and blue lost by 3 points. As the season progressed, Crane looked like this would be their year. Ending up in the big four of the West Section, they went into the quarterfinals. Bad breaks again caught up with the Cougars, who were downed in an overtime 46-43. Many things have occurred in the past, but this was one of the greatest disappointments of the year. The team had that old Crane spirit, but was lacking the certain something which can't be explained. Let's look forward to a City Championship next year.

B A S K E T B A L L

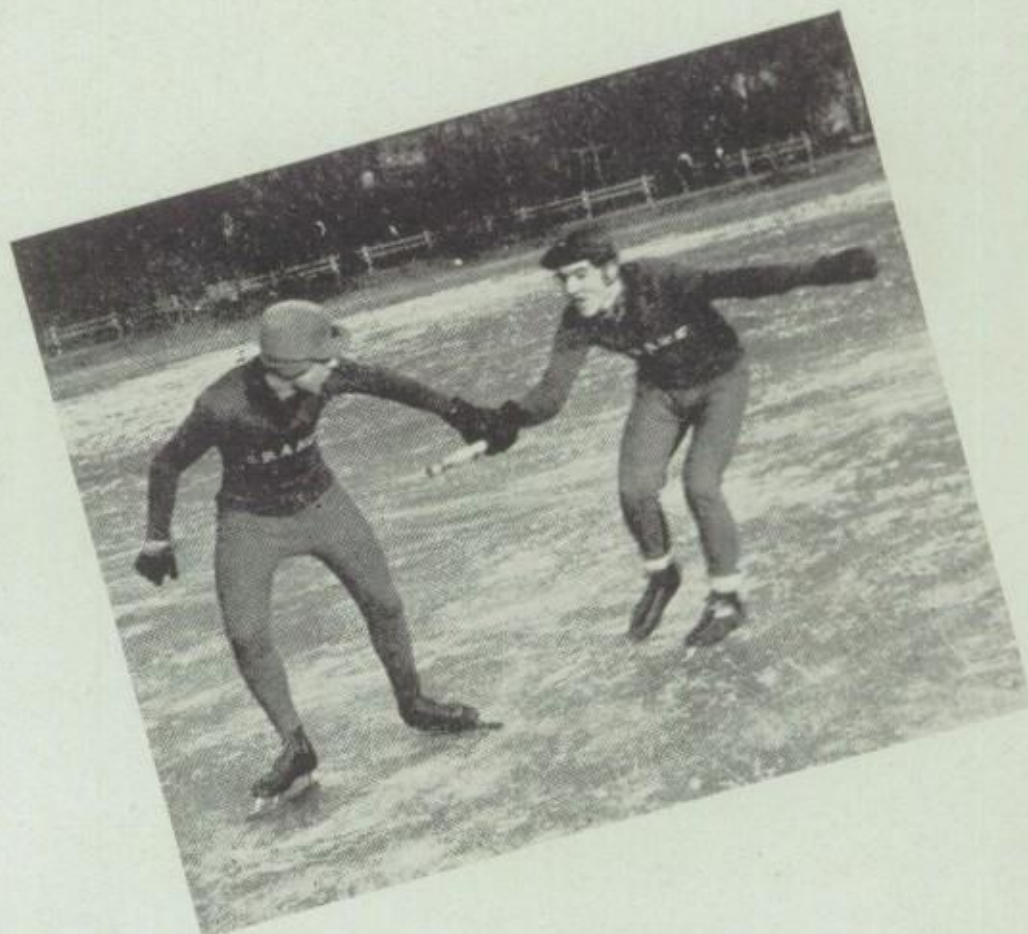

Juniors . . .

★ Sparked by the outstanding play of their Capt. Paul O'Hanion, and the fine play of Sosnicki, Berk, Sowa, Anderson, Bromberg and Alefross, the Crane Juniors finished second in the West Section. Losing many of the boys to the senior team the juniors had very few returning letter men. Coach Edelcup however, built his team with an eye for the future. Over 75% of the juniors are sophomores or lower. Against our stellar rival Marshall who has become known all over the nation, Crane battled with everything they had. Going into the third period with a good chance to win, Crane lost all hope, as three first team members were drawn out by fouls. The team achieved some laurels this year, but watch them go next year.

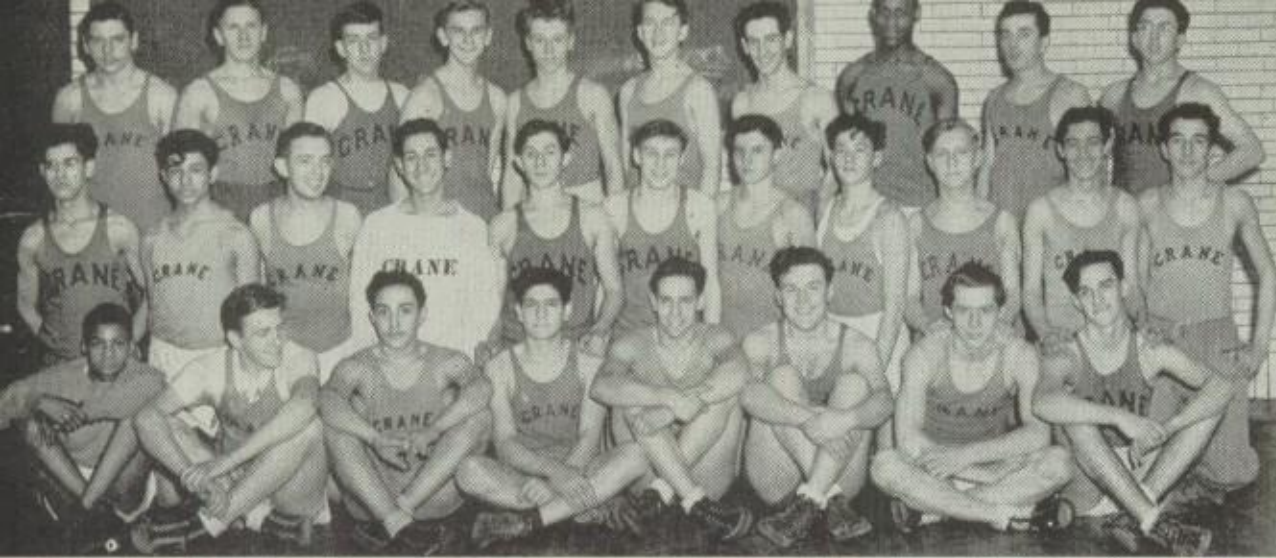

I C E S K A T I N G

★ It was a cold dusk morning on January 15, 1944, that the Crane speedsters set out in search of the City skating title. However, the results read fourth place for the seniors, fifth place for the juniors. Senn high school won the senior title and Lane Tech won the junior title. Even though they lost, Crane walked off the field with a few laurels to their credit. It all began when the red and blue took a fourth place in the 440 yard dash, Cougar Jim Puleo doing the skating. The junior relay team, composed of Walter Schoepke, Clifford Saltzman, Joe Carlson and Jack Lococo also placed fourth. In the senior division, high honors were taken by Captain Art Sayers and John Hoenig. Hoenig, last year's mile champ, took a second place in that event this year, losing to

John Klemund of Schurz, the 1943 Junior Silver Skate champ. Captain Art Sayers was tops by taking a first place in the senior half mile. Praise goes to the entire team and to coach Steinmetz, hoping that next year will be their year.

T R A C K

★ Led by Coach Moore and a great deal of hard training, the track teams at Crane went on to achieve much honor. The juniors turned out one of the best teams in Crane's history. Led by such boys as Chioles, captain of the junior indoors, undefeated in the 220, and anchorman of the relay team, the juniors beat such teams as St. Ignatius, champs of the Catholic league. This victory over the Catholic school, was one of the most stunning defeats in high school competition, due to the fact that the rules in the Catholic league as to size and weight, favored St. Ignatius. Starting the outdoor season with Vearino the 660 man as captain, the juniors took such teams as Steinmetz, Harrison, Senn, and Du Sable. This is easy to understand, when you consider the fine relay team of Chioles, Grisham, Marini, and Marinos, along with little Krop who, although he weighs less than 105 pounds, took a first in the Oak Park relay. To

further bolster the team, Clay, first rate hurdler, and Colosuno, great shot putter, the team has great hopes of taking the city title.

Next, considering the seniors, the best in the past few seasons, Coach Moore went ahead with advanced training, and many workouts. In doing this he turned out such boys as Skobel, undefeated in city mile; McCarthy, gathering 94 points in a season; Packard, Fitzgerald and many others of equal caliber. In the shot put, it was Liccardi and DeSimone, who upheld the colors of Crane, in its unusual high standard. Next to be applauded is the undefeated relay team of Packard, Nickoolos, McCarthy and Fitzgerald. With latimer at the hurdles, Crane was again well represented. Last but not least, Ferrera, who took many firsts in the various competitions. It was a fine season for both teams, and we are looking forward to a city championship in the near future.

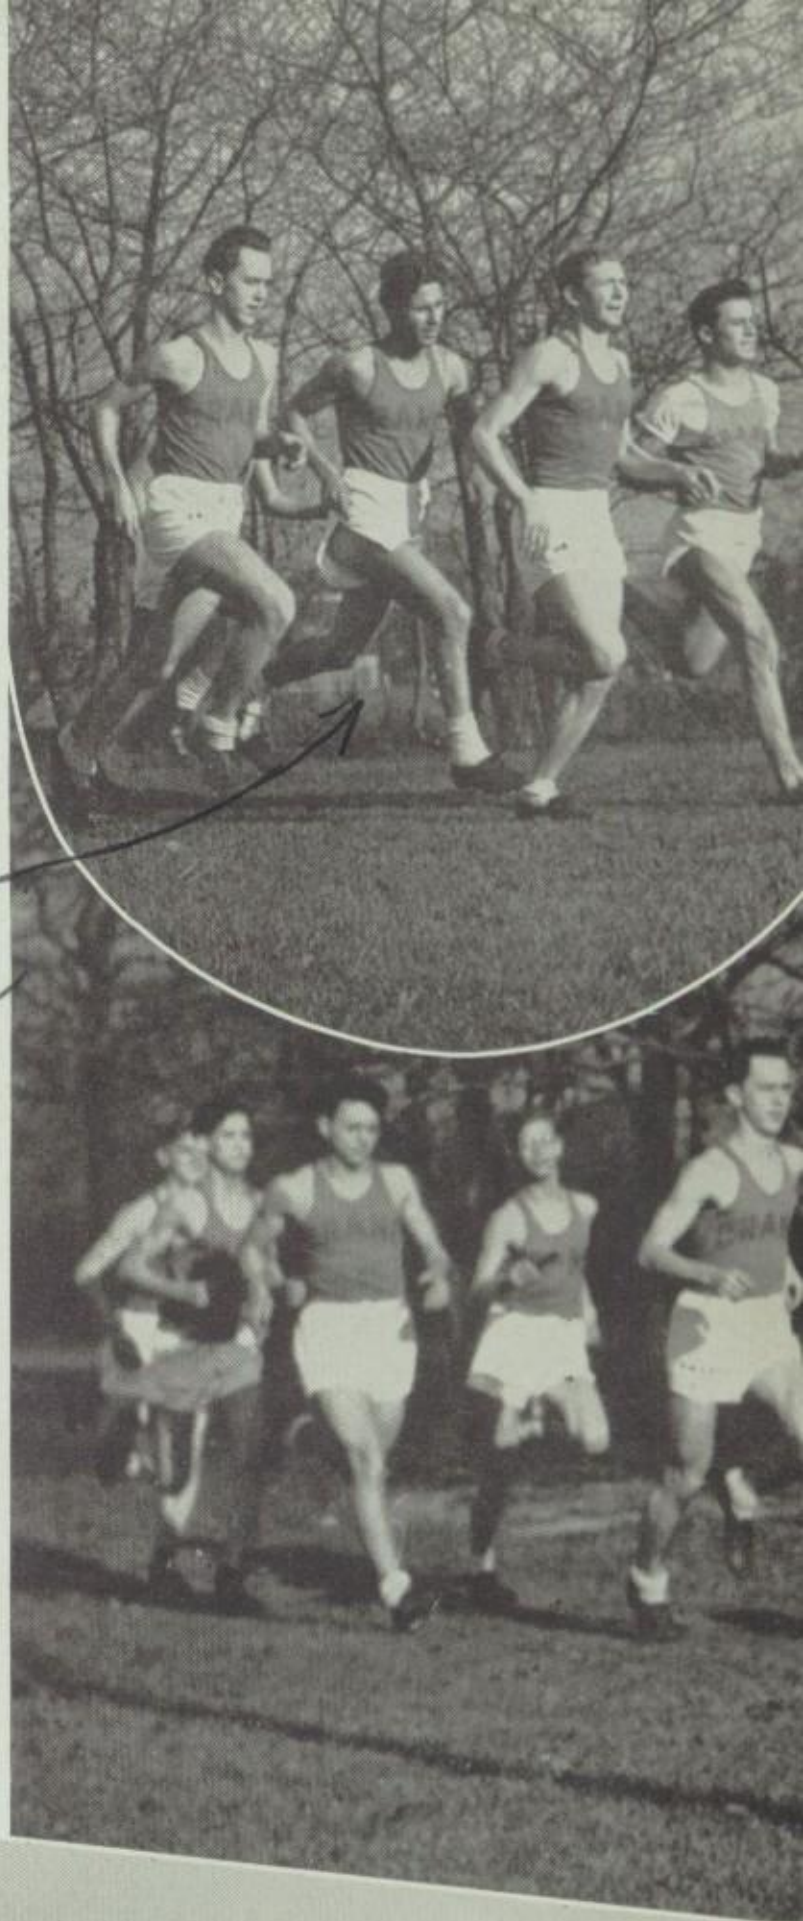

CROSS COUNTRY

★ As we close the books on another season we read a third place in the city meet for the high spirited harriers. The meet was won by Lane for the fourth straight year. Taking top honors for Crane was Sam Skobel, losing the race by one step to Ralph Dowling of Schurz, whose time for the two mile jaunt was 10:9:7/10. In second place for Crane was Captain Frank Pospisil who placed 12th, with Sol Ferrera stepping on his heels and placing 14th. The next in line were Russell Tornabene and John Marrella, taking 26th and 28th places respectively. Closing up the ranks were Albert Aldana, Wally Cichon, Benny Moreno, Robert Kowske and Joe Bruna. The boys hope that when we close the books next year we can read city champs.

★ Third place in city was the goal attained by the Crane gymnasts this year. It was a goal attained by much hard work under the very capable hand of Coach Horschke. Working many nights with the boys after school, coordination of the mind and body were attained. The team was composed by such men as Lacina, Mizrahi, Zaradnick, and Alphavodic. Steblich, Goldberg and many others helped give the team the needed finesse to achieve a rating near the top three. It is a fine record, and we are looking for a city title next year. Many of the boys are returning, and the chances look good.

FENCING

★ City Championship! Yes, we did it. The fencers, led by Captain Jack Waldier, went through an undefeated season, and took the city championship. The team was superb, under the coaching of Julian Steinmetz. They won their scheduled meets by such outrageous scores as 15-1 over Lindbloom. All the fencers deserve a hand, as they have taken Crane's first City Championship since 1940. The team has great hopes for next year, and hope that they can do it again.

SOCCER

★ It takes three years to produce a championship Soccer team. With this in mind Coach Steinmetz set out to build a team of the future. Most of the boys were inexperienced, and the team lost many of their games. Constant drill and hard playing however, was a good coach. Many of the boys will return next season, and will form a team that is well experienced in all the intricacies of the game of Soccer. With this and an eye for the future in mind, we look forward to a city title next year. How's about it, fellows?

★ With city championship in mind, and a number of returning lettermen the Crane wrestlers started their season. Receiving some of the toughest competition in years, the team plowed through it with many victories. Losing only two season matches, one to the state champs, Proviso, and the other to the city champs, Tilden, and winning all the rest, the Cougars entered the city meet with great confidence. Qualifying more boys than any other school, the seven Craneites entered the finals. Winning out in the finals were, Co-Captain Joe Sturgulewski, Jim Lasso, and Lester Schmidt. Runner-ups were Sam Guarenò, Joe Biloto, Co-Captain Albert Stern, and John Sension. Much of the credit for the past fine season should be given to Coach Mann, who worked diligently with the boys. Here's looking to a great season next year.

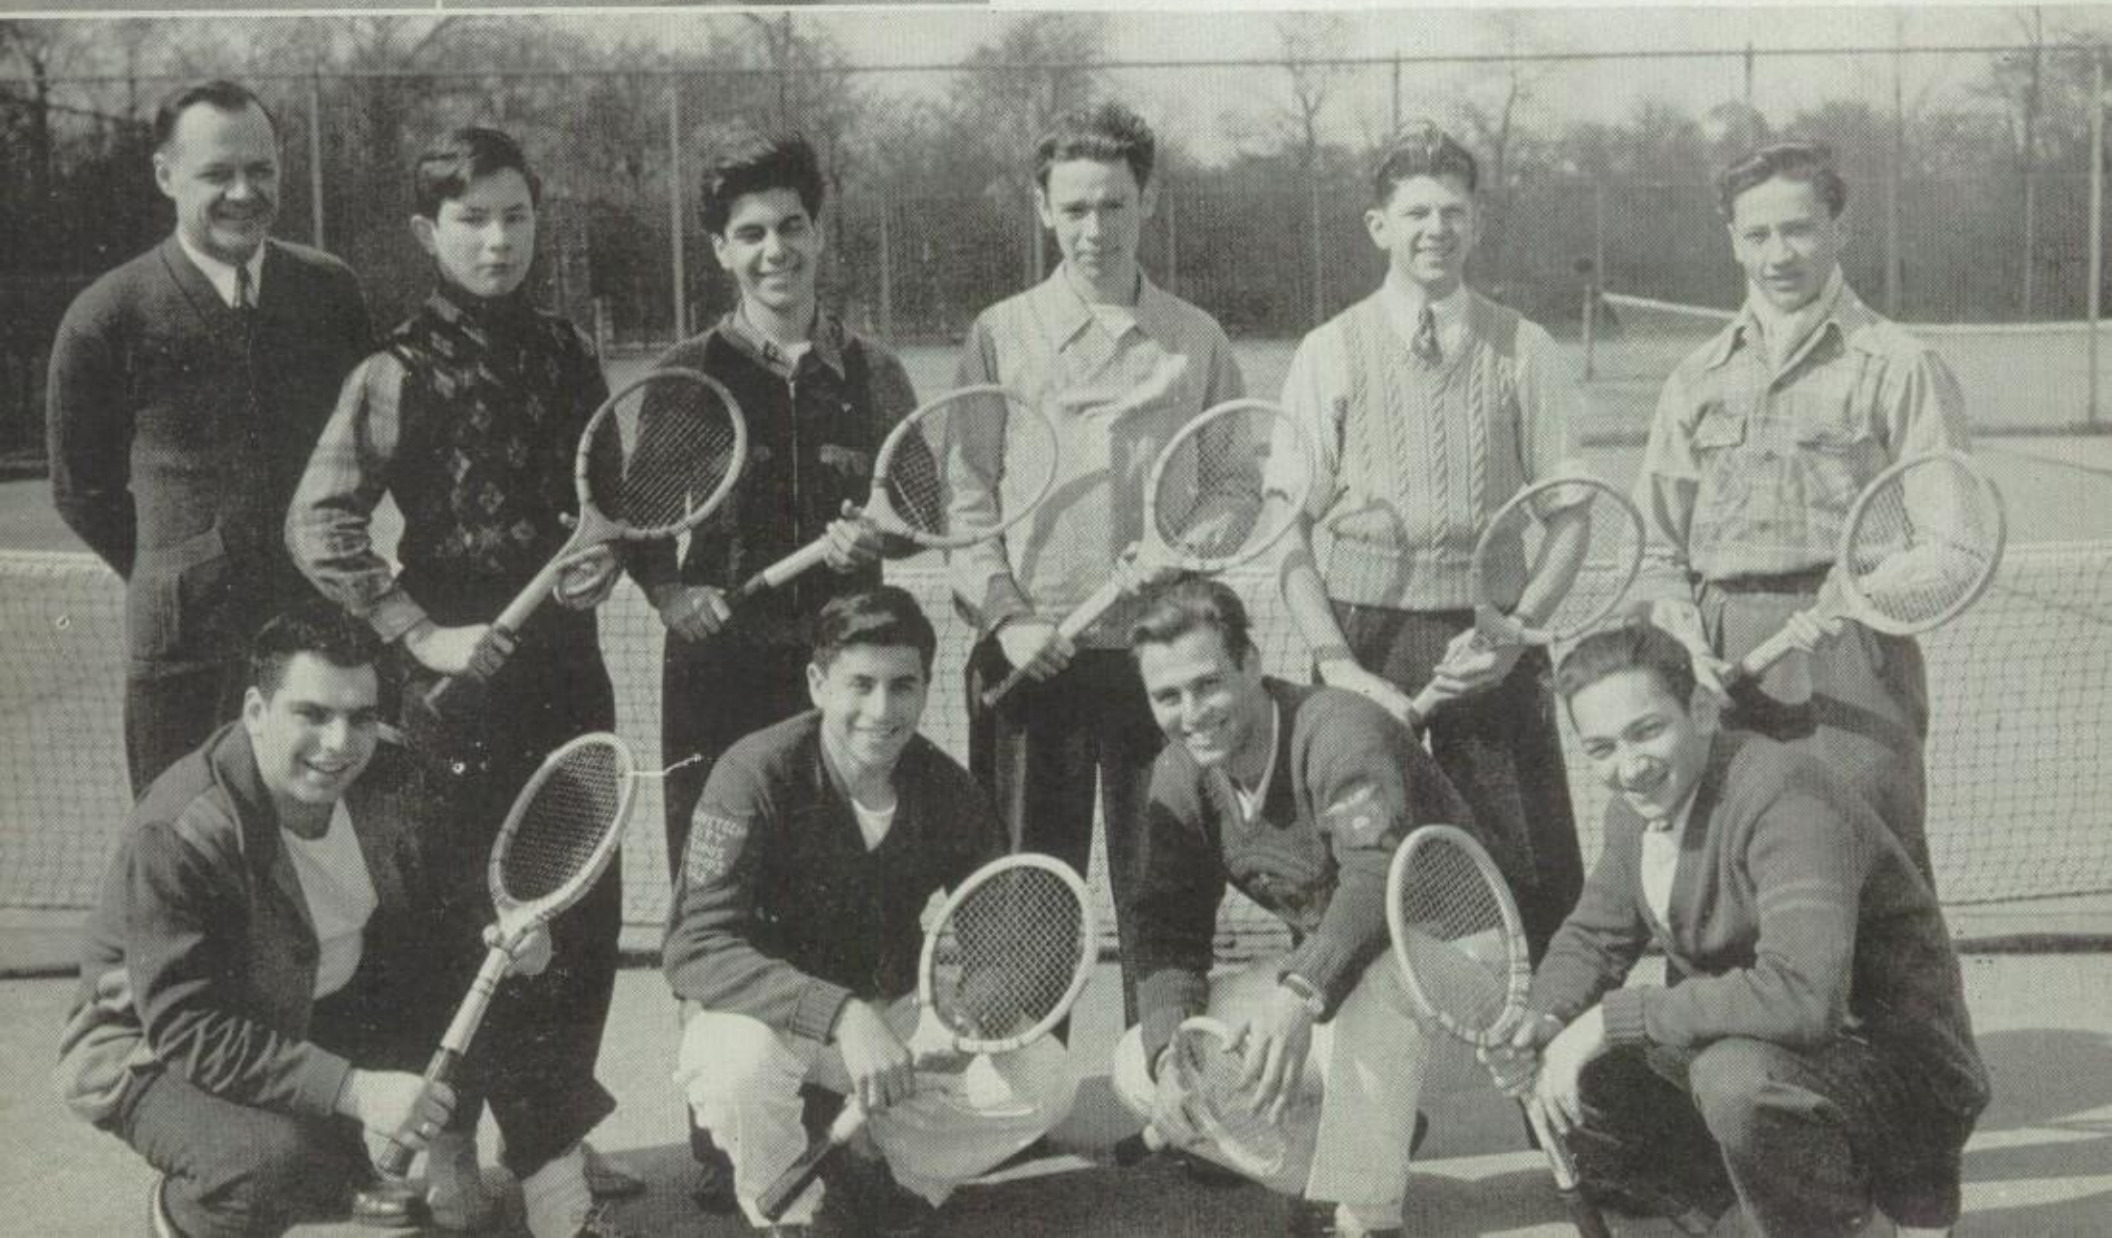

T E N N I S

★ Cougartown netmen, bolstered by five returning major lettermen, are looking forward to capturing the coveted city title, which they relinquished in 1943. This year, Captain Joey Weiss and Marvin Silverberg will be expected to spearhead the Cougar attack. Rounding out the team will be Phil Margolis, Charles Axelrod, and Bob Kulik, all fighting for the number three and four positions on the squad. The netmen will undoubtedly receive terrific competition from powerful Evanston and Oak Park, in their pre-season matches. Due to circumstances, Schurz has dropped tennis, and consequently Crane has been moved to the Central Section. The lack of competition in this section practically assures Crane of a Central Section title, and a berth in the city playoffs. In this year's state qualifying round, Captain Joey Weiss is expected to qualify in the singles, while Silverberg will team up with Margolis, to achieve one of the better doubles teams in the state. Coach Julian Steinmetz has worked diligently with the boys, and only the future will see the outcome.

★ Starting the season with four returning major letter men, the Cheerleading Team was ready for a great season. However, through various difficulties, two of the returning letter men were obliged to leave school. The team went on with a whole stock of reserves, weeding them out as the season progressed. The football season cheering was spirited, and was climaxed by the Steinmetz game. During the Christmas season the team was given a great honor, when they were chosen the best in the city by WGN

and the Tribune. Seymoure Weiner, captain of the squad, was chosen best cheerleader in the city. Arthur Alterman, the other captain, was rated in the first ten. The cheer team then experienced the best basketball season of the last four years. During the end of the season the team was again honored, being chosen second in the state. Much credit is to be given to Coach Lange, who coached the team from a sick bed for the full season.

★ By giving the score of the Crane Baseballer's first regular game, is the best way of expressing the power of the team this year. The game was against Tuley, and the score read Crane 20, Tuley 0. It was a no hit game for the red and blue pitcher, Gene Revell, and the first of the current city league. The team features Koszka, Blazina, Noverini and Mininni in the infield, Markel, Lampo and J. Grimes in the outfield. Sparked by Gene Revell on the mound and G. Grimes behind the plate, the battery is

bolstered by Savno. The boys from Cougartown went through a hard practice season, playing such teams as Lane, last North Section champs, and others equally as tough. Potentially strong teams in the West Section are Marshall and Steinmetz. If Crane can surpass these teams, it would mean a West Section championship. But this only the future can tell. Coach Edelcup has done a great job and the red and blue hopes that his work will lead Crane to a City Championship.

★ Led by Coach Malo, the Crane intramurals have given way to a program of Physical Fitness. The program coincides with the Army-Navy program, which shows the weaknesses of the boys when they enter service, and what exercises should be done to correct them. It is the purpose of the gym staff to build the boys up to a possible peak of physical fitness. With this accelerated program, the coaches are building a healthy body and mind product in every Crane boy they turn out. From the former 2 periods a week, gym has been built up to 4 periods a week. Much credit must also be given to the health department which instructs the boys in diet, exercise, and general health rules. A strong and healthy goal was the task at the beginning of the year. We may conclude by saying that it has been achieved successfully.
